Handbook of Research on the Relationship Between Autobiographical Memory and Photography Ingham, Mark Bruce Nigel, Milic, Nela, Kantas, Vasileios, Andersdotter, Sara, Lowe, Paul, 2023-02-17 Autobiographical memory and photography have been inextricably linked since the first photographs appeared during the 19th century These links have often been described from each other's discipline in ways that often have led to misunderstandings about the complex relationships between them The Handbook of Research on the Relationship Between Autobiographical Memory and Photography covers many aspects of the multiple relationships between autobiographical memory and photography such as the idea that memory and photography can be seen as forms of mental time and the effect photography has on autobiographical memory Covering key topics such as identity trauma and remembrance this major reference work is ideal for industry professionals sociologists psychologists artists researchers scholars academicians practitioners educators and students

Performing Early Christian Literature Kelly Iverson, 2021-10-07 Scholars of early Christian literature acknowledge that oral traditions lie behind the New Testament gospels While the concept of orality is widely accepted it has not resulted in a corresponding effort to understand the reception of the gospels within their oral milieu In this book Kelly Iverson reconsiders the experiential context in which early Christian literature was received and interpreted He argues that reading and performance are distinguishable media events and significantly that they produce distinctive interpretive experiences for readers and audiences alike Iverson marshals an array of methodological perspectives demonstrating how performance generates a unique experiential context that shapes and informs the interpretive process Iverson's study explores the dynamic oral environment in which ancient audiences experienced the gospel stories He shows why an

understanding of oral performance has important implications for the study of the NT as well as for several issues that are largely unquestioned by biblical scholars

Performing Memory Luisa Passerini, Dieter Reinisch, 2023-06-09 Through a post 1968 perspective on the past 50 years Performing Memory brings together case studies on new developments in the relationship between politics and visual representation including the histories of dance theatre political performance and cinema and investigates how they relate to the interlinked concepts of visibility corporeality and mobility Using a collective transdisciplinary attitude from within historical disciplines and looking across to artistic fields this volume demonstrates that memory is not merely a recollection of experience but an interactive process in which the body mobile and constrained is both a point of departure and reference

Working Memory and Language in the Modular Mind John Truscott, 2022-06-16 The book explores two fundamental aspects of the human mind and their relation to one another The first is the way that information is put to use in the mind When we are doing a mental arithmetic problem for example how do we bring the relevant bits of information to mind and hold them there while carrying out the series of calculations This is working memory the subject of an enormous research literature in psychology neuroscience and a great many other disciplines Characterizing the working memory process is now a major part of efforts to understand the human mind How we characterize this process depends of course on how we characterize the human mind as a whole In particular is the mind made up of a number of distinct units each carrying out a specialized function There is considerable reason to say that it is and this modular view of the mind has become prominent in a great deal of academic work notably in cognitive neuroscience with important implications for our understanding of how working memory works But these implications have received surprisingly little consideration to this point The aim of the book is to explore this relation between working memory and modularity first in general terms and then using a specific modular view of the mind the Modular Cognition Framework The ideas are illustrated and further developed through an application to language and especially second language acquisition and use

The Mobility of Memory Luisa Passerini, Milica Trakilović, Gabriele Proglia, 2020-10-06 Migration is most concretely defined by the movement of human bodies but it leaves indelible traces on everything from individual psychology to major social movements Drawing on extensive field research and with a special focus on Italy and the Netherlands this interdisciplinary volume explores the interrelationship of migration and memory at scales both large and small ranging across topics that include oral and visual forms of memory archives and artistic innovations By engaging with the complex tensions between roots and routes minds and bodies The Mobility of Memory offers an incisive and empirically grounded perspective on a social phenomenon that continues to reshape both Europe and the world

Memory Unbound Lucy Bond, Stef Craps, Pieter Vermeulen, 2016-11-01 Though still a relatively young field memory studies has undergone significant transformations since it first coalesced as an area of inquiry Increasingly scholars understand memory to be a fluid dynamic unbound phenomenon a process rather than a reified object Embodying just such an elastic approach this state of the field

collection systematically explores the transcultural transgenerational transmedial and transdisciplinary dimensions of memory four key dynamics that have sometimes been studied in isolation but never in such an integrated manner Memory Unbound places leading researchers in conversation with emerging voices in the field to recast our understanding of memory's distinctive variability

Memory and the English Reformation Alexandra Walsham, Bronwyn Wallace, Ceri Law, Brian Cummings, 2020-11-12 The dramatic religious revolutions of the sixteenth and seventeenth centuries involved a battle over social memory On one side the Reformation repudiated key aspects of medieval commemorative culture on the other traditional religion claimed that Protestantism was a religion without memory This volume shows how religious memory was sometimes attacked and extinguished while at other times rehabilitated in a modified guise It investigates how new modes of memorialisation were embodied in texts material objects images physical buildings rituals and bodily gestures Attentive to the roles played by denial amnesia and fabrication it also considers the retrospective processes by which the English Reformation became identified as an historic event Examining dissident as well as official versions of this story this richly illustrated interdisciplinary collection traces how memory of the religious revolution evolved in the two centuries following the Henrician schism and how the Reformation embedded itself in the early modern cultural imagination

Postnational Memory, Peace and War Nigel Young, 2019-11-26 This book examines the phenomenon of modern memory as a reaction to total war an aspiration to truth seeking provoked by the independent forces of modern war and collective violence which is transnational or postnational in character Using examples from prose and poetry film and theatre painting and photography and music and the popular arts the author traces a narrative path through the events of the twentieth century defining the tradition of modern memory in terms of its essentially anti militaristic anti war character as expressed in the manner in which it represents recalled violence and atrocity Through a series of thematic discussions of two world wars the Shoah urbicide and nuclear weapons Postnational Memory explores the formation of transnational memory drawing on examples from industrialized societies with a focus on memory of real events and their reproduction in literature and the arts often including personal recollections that link the self to the represented past As such by asking how the concept of modern memory is constructed through the victims of war and genocide the book constitutes an alternative to national memories and hegemonic militarist or ethnocentric histories Surveying the emergence of new transnational forms of remembering the past it will appeal to students and scholars of sociology memory studies and peace studies as well as those working in disciplines such as modern and international history cultural studies and military studies

Configuring Memory in Czech Family Sagas Marcin Filipowicz, 2021-11-09 *Configuring Memory in Czech Family Sagas* The Art of Forgetting in Generic Tradition explores how literature may configure family memory Family sagas can be viewed as a structure helping us to share our memories Special attention will be paid to crucial generic motifs within family sagas as well as to elements of the narrative structure which hold powerful memory forming potential The book proves that this potential can be fulfilled in two ways The

genre under analysis tends to strengthen the bad family memory and consider it as a burden and to encourage one to forget their family past Despite the prevalence of the saga as a cultural form right across mass media the literary genre of the family saga has not attracted intensive critical acclaim Readers of this book will not only learn more about the genre of family saga but also be encouraged to reflect on their own family memories

Jesus the Jew in Christian Memory Barbara U. Meyer, 2020-03-12 Shows how research and reflection on Jesus's Jewishness transforms contemporary Christian thought on memory otherness natality and law Hermeneutics, History and Memory Philip Gardner, 2010-01-21 History is the true record of an absent past The trust between historians and their readers has always been founded upon this traditional claim In a postmodern world that claim and that trust have both been challenged as never before drawing either angry or apologetic responses from historians Hermeneutics History and Memory answers differently It sees the sceptical challenge as an opportunity for reflection on history's key processes and practices and draws upon methodological resources that are truly history's own but from which it has become estranged In seeking to restore these resources to return history to its roots this book presents a novel contribution to topical academic debate focusing principally upon the challenges and detours of historical methodology hermeneutic interpretation in history the work of Paul Ricoeur the relation between history and memory Hermeneutics History and Memory will appeal to experienced historical researchers who seek to explore the theoretical and methodological foundations of their empirical investigations It

will also be highly beneficial to research students in history and the social sciences concerned with understanding the principles and practices through which documentary analysis and in depth interview can be both validated and conducted
