

**Activity A (continued from previous page)**

4. **Observe:** Click **Reset**. Select **Lights on** and turn off **Show rulers**. Select **Longitudinal waves**. Check that the **Amplitude** is 10.0 cm, the **Frequency** is 1.00 Hz, and the **Tension** is 2.0 N. Set the **Density** to 1.0 kg/m, and click **Play**.

- What is the motion of the hand? **The motion of the hand is moving from left to right.**
- Turn the lights off. What is the motion of the green dot? **It also moves from side to side (left to right).**
- Follow the motion of a single compression of the wave. How does the compression move? **From left to right.**

In a **longitudinal wave**, the motion of the medium is parallel to the direction of the wave. So, each point of the spring moves back and forth as the wave is transmitted from left to right.

5. **Measure:** With the lights on, click **Pause**. Turn on **Show rulers**.

- The wavelength of a longitudinal wave is equal to the distance between two successive compressions (or rarefactions). What is this distance? **10.0 cm.**
- How does this compare to the wavelength of the comparable transverse wave? (See your answer to question 2C.) **The only thing that changed was the type of wave.**

6. **Measure:** Click **Reset**. The amplitude of a longitudinal wave is equal to the distance a point on the wave is displaced from its resting position. Turn off the lights. Click **Play**, and then click **Pause**. Use the horizontal ruler to measure the width of the green trace.

- What is the width of the green trace? **20 cm.**
- The amplitude is equal to half of this distance. What is the amplitude? **10 cm.**

7. **Calculate:** Click **Reset**. Select **Transverse waves**. Select **Lights on** and **Show grid** and turn off **Show rulers**. Set the **Frequency** to 0.50 Hz. A single cycle is the time it takes the hand to move up, move down, and then back up to the starting position. Click **Play**, and then click **Pause** after exactly one cycle. (This may take a few tries.)

- How long does one cycle take? **About 2 seconds.** This is the **period** ( $T$ ) of the wave.
