Abstract: The authors examined the effects of a 10-week, 12-session, 120-min program on the self-esteem of 100 adolescents with a history of sexual abuse. The program was designed to help adolescents understand the effects of sexual abuse, develop coping strategies, and build self-esteem. The program was evaluated using a pretest-posttest design. Results indicated that the program had a significant positive effect on the self-esteem of the adolescents. The program was found to be effective in helping adolescents understand the effects of sexual abuse, develop coping strategies, and build self-esteem.
