Local Space, Global Life Luis Eslava, 2015-07-09 This book examines the everyday functioning and impact of international law and the development project particularly across cities in emergent nations.

International Law and Child Soldiers Gus Waschefort, 2014-12-04 This book commences with an analysis of the current state of child soldiering internationally. Thereafter, the proscriptive content of contemporary norms on the prohibition of the use and recruitment of child soldiers is evaluated so as to determine whether these norms are capable of better enforcement. An issues-based approach is adopted in terms of which no specific regime of law such as international humanitarian law (IHL) is deemed dominant. Instead, universal and regional human rights law, international criminal law and IHL are assessed cumulatively so as to create a mutually reinforcing web of protection. Ultimately, it is argued that the effective implementation of child soldier prohibitive norms does not require major changes to any entity or functionary engaged in such prevention; rather, it requires the constant reassessment and refinement of all such entities and functionaries, and here some changes are suggested. International judicial, quasi-judicial and non-judicial entities and functionaries most relevant to child soldier prevention are critically assessed. Ultimately, the conclusions reached are assessed in light of a case study on the use and recruitment of child soldiers in the Democratic Republic of the Congo.

The Concerned Women of Buduburam Elizabeth Holzer, 2015-10-15 In The Concerned Women of Buduburam Elizabeth Holzer offers an unprecedented firsthand account of the rise and fall of social protests in a long standing refugee camp The UN High Commissioner for Refugees UNHCR and the host government of Ghana established the Buduburam Refugee Camp in 1990 to provide sanctuary for refugees from the Liberian civil war 1989-2003 Long hailed as a model of effectiveness Buduburam offered a best case scenario for how to handle a refugee crisis But what happens when refugees and humanitarian actors disagree over humanitarian aid In Buduburam refugee protesters were met with Ghanaian riot police Holzer uses the clash to delve into the complex and often hidden world of humanitarian politics and refugee activism Drawing on fifteen months of ethnographic fieldwork in Ghana and subsequent interviews with participants now returned to Liberia Holzer exposes a distinctive form of rule that accompanies humanitarian intervention compassionate authoritarianism Humanitarians strive to relieve the suffering of refugees but refugees have little or no access to grievance procedures and humanitarian authorities face little or no accountability for political failures By casting humanitarians and refugees as co creators of a shared sociopolitical world Holzer throws into sharp relief the contradictory elements of humanitarian crisis and of transnational interventions in poor countries more broadly

The Tragedy of Failure Tiffiany O. Howard, 2010-04-21 This intriguing approach to international conflict seeks to facilitate a dialogue between academics and policymakers on how to better anticipate and prevent state failure subsequent forced migration and the

terrorist threat that often results. Despite the far reaching implications of state failure little research has been devoted to its consequences. Postulating that failed and failing states enable the existence of terrorist organizations, *The Tragedy of Failure: Evaluating State Failure and Its Impact on the Spread of Refugees, Terrorism and War* bridges that gap. Both descriptive and prescriptive, the book offers a nuanced examination of the relationship between forced migration, state failure and terrorism. The author suggests policy strategies that are capable of anticipating the onset of forced migration situations before they develop into crises and presents quantitative forecasting models with the ability to predict the occurrence of state failure and forced migration as much as two years in advance. Buoyed by this work and the tools it offers, policymakers can focus more closely on the issue of failed states and the movement of refugees and internally displaced persons in the interest of targeting and eliminating dangerous terrorist organizations. **Handbook of Ethnic Conflict** Dan Landis, Rosita D.

Albert, 2012-02-14 Although group conflict is hardly new, the last decade has seen a proliferation of conflicts engaging intrastate ethnic groups. It is estimated that two thirds of violent conflicts being fought each year in every part of the globe, including North America, are ethnic conflicts. Unlike traditional warfare, civilians comprise more than 80 percent of the casualties and the economic and psychological impact on survivors is often so devastating that some experts believe that ethnic conflict is the most destabilizing force in the post Cold War world. Although these conflicts also have political, economic and other causes, the purpose of this volume is to develop a psychological understanding of ethnic warfare. More specifically, *Handbook of Ethnopolitical Conflict* explores the function of ethnic, religious and national identities in intergroup conflict. In addition, it features recommendations for policy makers with the intention to reduce or ameliorate the occurrences and consequences of these conflicts worldwide. *HIV/AIDS Treatment in Resource Poor Countries* Yichen Lu, Max Essex, Chris Chanyasulkit, 2012-10-26

The book focuses on HIV/AIDS prevention and treatment strategies in resource poor settings. Contributors include HIV/AIDS researchers and public health administrators from the US, Africa, China and Thailand. Several chapters written by local health officials take a close look at AIDS prevention and treatment in China at the community level. Other chapters cover issues of treatment, scale up, drug resistance and mother to child transmission in Southern Africa and Thailand and offer lessons learned for researchers in other developing countries. Overall, the aim of this book is to bring some of the latest issues to the fore and to foster exchange and collaboration between AIDS researchers in developing countries. This book grew out of an annual conference held in China and organized by the Harvard School of Public Health and could possibly become the first volume of a series. **State Fragility and State Building in Africa** Dele Olowu, Paulos Chanie, 2015-10-19

This book describes the contrast between the strong economic growth and democratization that have occurred in Africa and its stalling political progress. It presents and discusses fragility as the phenomenon that has caused the state to remain weak and faltering and has led to at least one third of the continent's citizens living in fragile states. Following the examination of the drivers of fragility and the impact of fragility on citizens and neighbouring states, the book discusses

capacity building approaches This part shows how effective states can be built on the African continent a process that would result in a change from state fragility to state resilience It is based on lessons learnt from close studies of the nations where the state has been most developed in the region in Eastern and Southern Africa The book provides and responds to the most recent and up to date information on African development and uses insights of people who have lived and worked in the continent for most of their lives
