The Case for a Carbon Tax Shi-Ling Hsu, 2012-06-22 There's a simple straightforward way to cut carbon emissions and prevent the most disastrous effects of climate change and we're rejecting it because of irrational political fears That's the central argument of *The Case for a Carbon Tax* a clear eyed sophisticated

analysis of climate change policy Shi Ling Hsu examines the four major approaches to curbing CO2 cap and trade command and control regulation government subsidies of alternative energy and carbon taxes Weighing the economic social administrative and political merits of each he demonstrates why a tax is currently the most effective policy Hsu does not claim that a tax is the perfect or only solution but that unlike the alternatives it can be implemented immediately and paired effectively with other approaches In fact the only real barrier is psychological While politicians can present subsidies and cap and trade as win win solutions the costs of a tax are immediately apparent Hsu deftly explores the social and political factors that prevent us from embracing this commonsense approach And he shows why we must get past our hang ups if we are to avert a global crisis

and Education Policy Bob Lingard,Goli Rezai-Rashti,Wayne Martino,2017-10-02 Around the globe various kinds of testing including high stakes national census testing have become meta policies steering educational systems in particular directions and having great effects on schools and on teacher practices as well as upon student learning and curricula There has also been a complementary global aspect to this with the OECD s PISA and IEA s TIMSS and PIRLS which have had impacts on national education systems and their policy frameworks While there has been a globalized educational policy discourse that suggests that high stakes standardised testing will drive up standards and enhance the quality of a nation s human capital and thus their international economic competitiveness this discourse still manifests itself in specific vernacular path dependent ways in different nations High stakes testing and its effects can also be seen as part of the phenomenon of the datafication of the world and policy as numbers linked to other reforms of the state including new public management network governance and top down and test based modes of accountability This edited collection provides theoretically and empirically informed analyses of these developments This book was originally published as a special issue of the Journal of Education Policy *Student Participation in Online Discussions* Khe Foon Hew,Wing Sum Cheung,2012-06-13 The

increasingly prevalent use of online or blended learning in schools universities has resulted in asynchronous online discussion forum becoming an increasingly common means to facilitate dialogue between instructors and students as well as students and students beyond the boundaries of their physical classrooms This proposed academic book contributes to the literature on asynchronous online discussions in the following three main ways First it reviews previous research studies in order to identify the factors leading to limited student contribution Limited student contribution is defined as students making few or no postings students exhibiting surface level thinking or students demonstrating low level knowledge construction in online discussions It then identifies the various empirically based guidelines to address the factors Second three potential guideline dilemmas that educators may encounter a use of grades b use of number of posting guideline and c instructor facilitation are introduced These are guidelines where previous empirical research shows mixed results when they

are implemented Acknowledging the dilemmas is essential for educators and researchers to make informed decisions about the discussion guidelines they are considering implementing Third nine exploratory case studies related to student facilitation and audio based discussion are reported on and examined Using students as facilitators may be an alternative solution to educators who wish to avoid the instructor facilitation guideline dilemma Using audio discussion would be useful for participants with poor typing skills or those who prefer talking to typing The proposed book is distinctive in comparison to current competitor titles because all the findings and guidelines are empirically based Furthermore the nine expanded case studies provided specifically address the issue of student peer facilitation and audio based discussion Student peer facilitation and audio discussion are two areas that hitherto received comparatively lesser attention compared to instructor facilitation and text based discussion
