**Grade: Global Environmental Ethics** Pojman, 1999-04-01      **The Ethics of Japan's Global Environmental Policy** Midori Kagawa-Fox, 2012-06-12 This book examines the Japanese government policies that impact on the environment in order to determine whether they incorporate a sufficient ethical substance Through the three case studies on whaling

nuclear energy and forestry the author explores how Western philosophers combined their theories to develop a Western environmental ethics code and reveals the existence of a unique Japanese environmental ethics code built on Japan's cultural traditions, religious practices and empirical experiences. Kagawa Fox's discussions show that in spite of the positive contributions that Japan has made towards the global environment the government has failed to show a corresponding moral obligation to the world ecology in its environmental policy. The book argues that this is a result of the integrity of the policies having been compromised by vested interests and that Japanese business and politics ensure that the policies are primarily focused on maintaining sustainable economic growth. Whilst Japan's global environmental initiatives are the key to its economic survival in the 21st century and these initiatives may achieve their aims they do however fail the Japanese code of environmental ethics. This book is essential reading for anyone interested in Environmental Studies, Environmental Policy and Ethics, Japanese Politics and Japanese Culture and Society.

Global Environmental Ethics Louis P. Pojman, 2000 Publisher Description **Ethics and Global Environmental Policy** Paul G. Harris, 2011. We've had 20 years of government level conferences at Kyoto, Copenhagen and Cancun but greenhouse gas emissions continue to rise. Taking a cosmopolitan approach to climate change in this excellent and timely book Paul Harris and his contributors argue that citizen action is an essential complement to state action. The challenging, unsettling and absolutely vital argument of these high quality essays is that distance makes no moral difference in our globalised world: individual high emitters have a duty to reduce their emissions wherever they are. Andrew Dobson, Keele University, UK. This collection of provocative essays re-evaluates the world's failed policy responses to climate change in the process demonstrating how cosmopolitan ethics can inform global environmental governance. A cosmopolitan worldview points to climate related policies that are less international and more global. From a cosmopolitan perspective national borders should not delineate obligations and responsibilities associated with climate change. Human beings rather than the narrow interests of nation states ought to be at the centre of moral calculations and policy responses to climate change. In this volume expert contributors examine questions of individual and global responsibility, burden sharing among people and states, international law and environmental justice, capitalism and voluntary action, pluralist cooperation and hegemony and alternative approaches to climate action and diplomacy. The book helps to illuminate new principles for global environmental policy that can come from cosmopolitan conceptions of climate change.
