elements in development discourse are uncovered whilst still recognising its progressive appropriations This new edition includes revisions throughout and an important new chapter on race and racism as well as a discussion of the evolution of the Sustainable Development Goals This book is perfect for students and researchers in development studies global history and discourse analysis as well as an interdisciplinary audience from international relations political science sociology geography anthropology language and literary studies *How Learning Works* John Almarode, Douglas Fisher, Nancy Frey, 2021-07-21 This book unpacks the science of how students learn and translates that knowledge into promising principles or practices that can be implemented in the classroom or utilized by students on their own learning journey

Global Studies Research Pamela A. Zeiser, 2019-06-27 Global Studies Research is a research methods textbook designed for interdisciplinary International Studies majors and their faculty The textbook introduces interdisciplinarity provides basic building blocks of relevant disciplinary knowledge explains a process for integrating knowledge from multiple disciplines and models this interdisciplinary International Studies Research Process in its presentation of the case studies Eco-Homes Doctor Jenny Pickerill, 2016-01-15 It is widely understood that good affordable eco housing needs to be at the heart of any attempt to mitigate or adapt to climate change This is the first book to comprehensively explore eco housing from a geographical social and political perspective It starts from the premise that we already know how to build good eco houses and we already have the technology to retrofit existing housing Despite this relatively few eco houses are being built Featuring over thirty case studies of eco housing in Britain Spain Thailand Argentina and the United States Eco Homes examines the ways in which radical changes to our houses such as making them more temporary using natural materials or relying on manual heating and ventilation systems require changes in how we live As such it argues it is not lack of technology or political will that is holding us back from responding to climate change but deep rooted cultural and social understandings of our way of life and what we expect our houses to do for us **Sustainable Engineering** Krishna R. Reddy, Claudio Cameselle, Jeffrey A. Adams, 2019-04-30 Comprehensively covers the definition methodology and current applications of the principles of sustainability and resiliency in every engineering discipline This book contains detailed information about sustainability and resiliency principles and applications in engineering practice and provides information on how to use scientific tools for sustainability assessment that help engineers select the best alternative for each project or activity Logically organized around the three pillars of sustainability environment economy and society it is a primary resource for students and professionals alike Sustainable Engineering Drivers Metrics Tools and Applications offers numerous ways to help engineers contribute towards global sustainable development while solving some of the grand challenges the world is facing today The first part of the book covers the environmental economic and social impacts associated with project product development as well as society as a whole This is followed by a section devoted to sustainability metrics and assessment tools which includes material flow analysis and material budget carbon footprint

analysis life cycle assessment environmental health risk assessment and more Next comes an in depth examination of sustainable engineering practices including sustainable energy engineering sustainable waste management and green and sustainable buildings The book concludes with a look at how sustainable engineering may be applied to different engineering i e environmental chemical civil materials infrastructure projects Some of the key features of this book include the following Provides a complete and sensible understanding of the important concepts of sustainability resiliency and sustainable engineering Offers detailed explanations of sustainable engineering practices in waste management and remediation of contaminated sites civil construction and infrastructure and climate geoengineering Presents a set of case studies across different engineering disciplines such as bio chemical environmental materials construction and infrastructure engineering that demonstrate the practical applicability of sustainability assessment tools to diverse projects Includes questions at the end of each chapter as well as a solutions manual for academic adopters The depth of coverage found in Sustainable Engineering Drivers Metrics Tools and Applications makes it an ideal textbook for graduate students across all engineering disciplines and a handy resource for active professionals

Population, Migration and Settlement in Australia and the Asia-Pacific Natascha Klocker,Olivia Dun,2018-12-07 The chapters in this book reflect on the work of seminal Australian geographer the late Professor Graeme Hugo Graeme Hugo was widely respected because of his impressive contributions to scholarship and policy in the fields of migration population and development which spanned several decades This collection of works contains contributions from authors whose own research has been influenced by Hugo and includes numerous authors who worked closely with Hugo throughout his career The collection provides an opportunity to reflect on Hugo s legacy and also to foreground contemporary scholarship in his key areas of research focus The chapters are organised into two thematic threads Part I contains works relating to Population Migration and Settlement in Australia while Part II focuses on Labour and Environmental Migration in the Asia Pacific Together these two thematic threads provide broad coverage of Graeme Hugo s key areas of research focus The chapters also serve as a reminder of Hugo s steadfast concern with producing careful scholarship for the public good and seek to prompt continued work in this vein The chapters originally published in special issues in Australian Geographer

Meaningful Pasts Russell Johnston,Michael Ripmeester,2024-01-31 In Meaningful Pasts Russell Johnston and Michael Ripmeester explore two strands of identity making among residents of the Niagara region in Ontario Canada First they describe the region s official narratives most of which celebrate the achievements of white settlers with a mix of storytelling rituals and monuments Despite their presence in local lore and landmarks these official narratives did not resonate with the nearly one thousand residents who participated in five surveys conducted over eleven years Instead participants drew on contemporary people places and events Second the authors explore the emergence of Niagara s wine industry as a heritage narrative The book shares how the survey participants embraced the industry as a local identifier and indicates how the industry s efforts have rekindled the residents

interest in agriculture as a significant element of regional heritage and local identities Revealing how the profiles of local narratives and commemorations become entwined with social cultural economic and political power Meaningful Pasts illuminates the fact that local narratives retain their relevance only if residents find them meaningful in their day to day lives

How to Confront Climate Denial James S. Damico, Mark C. Baildon, 2022 Climate change and climate denial have remained largely off the radar in literacy and social studies education This book addresses this gap with the design of the Climate Denial Inquiry Model CDIM and clear examples of how educators and students can confront two forms of climate denial science denial and action denial The CDIM highlights how critical literacies specifically designed for climate denial texts can be used alongside eco civic practices of deliberation reflexivity and counter narration to help students discern corporate financial and politically motivated roots of climate denial and to better understand efforts to misinform the American public sow doubt and distrust of basic scientific knowledge and erode support for evidence based policymaking and collective civic action With an emphasis on inquiry based teaching and learning the book also charts a path from destructive stories we live by that are steeped in climate denial humans are separate from nature the primary goal of society is economic growth without limits nature is a resource to be used and exploited to ecojustice stories To live by that invite teachers and students to consider more just and sustainable futures Book Features Climate Denial Inquiry Model to help educators identify and confront two forms of climate denial climate science denial and climate action denial Clear examples of how to integrate critical literacies designed specifically for climate denial with eco civic practices of deliberation reflexivity and counter narration Concrete climate based inquiry based teaching and learning pathways in literacy and social studies with much potential for connections across other content areas A path from destructive stories we live by that are steeped in climate denial to ecojustice stories To live by that invite teachers and students to consider more just and sustainable futures

Controlling Immigration James F. Hollifield, Philip L. Martin, Pia M. Orrenius, François Héran, 2022-09-27 The fourth edition of this classic work provides a systematic comparative assessment of the efforts of major immigrant receiving countries and the European Union to manage migration paying particular attention to the dilemmas of immigration control and immigrant integration Retaining its comprehensive coverage of nations built by immigrants the so called settler societies of the United States Canada Australia and New Zealand the new edition explores how former imperial powers France Britain and the Netherlands struggle to cope with the legacies of colonialism how social democracies like Germany and the Scandinavian countries balance the costs and benefits of migration while maintaining strong welfare states and how more recent countries of immigration in Southern Europe Italy Spain and Greece cope with new found diversity and the pressures of border control in a highly integrated European Union The fourth edition offers up to date analysis of the comparative politics of immigration and citizenship the rise of reactive populism and a new nativism and the challenge of managing migration and mobility in an age of pandemic exploring how countries cope with a surge in asylum seeking and the struggle

to integrate large and culturally diverse foreign populations Homelands Nadav G. Shelef, 2020-07-15 Why are some territorial partitions accepted as the appropriate borders of a nation's homeland whereas in other places conflict continues despite or even because of division of territory In Homelands Nadav G. Shelef develops a theory of what homelands are that acknowledges both their importance in domestic and international politics and their change over time These changes he argues driven by domestic political competition and help explain the variation in whether partitions resolve conflict Homelands also provides systematic comparable data about the homeland status of lost territory over time that allow it to bridge the persistent gap between constructivist theories of nationalism and positivist empirical analyses of international relations Society and the Environment Michael Carolan, 2018-05-15 Society and the Environment examines today's

environmental controversies within a socio-organizational context After outlining the contours of pragmatic environmentalism Carolan considers the pressures that exist where ecology and society collide such as population growth and its associated increased demands for food and energy He also investigates how various ecological issues such as climate change are affecting our very own personal health Finally he drills into the social structural dynamics including political economy and the international legal system that create ongoing momentum for environmental ills This interdisciplinary text features a three-part structure in each chapter that covers fast facts about the issue at hand examines its wide-ranging implications and offers balanced consideration of possible real-world solutions New to this edition are Movement Matters boxes which showcase grassroots movements that have affected legislation Discussion questions and key terms enhance the text's usefulness making Society and the Environment the perfect learning tool for courses on environmental sociology **5**
