A Field Guide to Ghost Guns Robert E. Walker, 2021-12-16 While it has always been legal for a citizen in the United States to manufacture their own firearm the sale and distribution of such items is illegal under current U.S. law. The primary impediment to individuals making their own weapons has been access to the tooling and machinery required to convert raw materials into finished parts for assembly. However in the last fifteen years this paradigm has changed drastically. Home builders and companies have emerged to support individuals who choose to produce their own firearm. Kits with receivers and gun components are available for hobbyists as are 3D printable gun designs downloadable from the Internet in some cases. This phenomenon has led to the term ghost guns firearms whose existence is not reported to any third party and therefore whose existence is unknown and largely untraceable.

A Field Guide to Ghost Guns For Police and Forensic Investigators provides a useful brief for field investigators on the technical aspects of the self made firearm so called ghost guns. The first book to focus on the emergent issue of ghost guns coverage addresses the history of firearms making and manufacture in the U.S. including regulated and nonregulated manufacturing details firearm components and accessories how to assemble a Firearm an overview of common Types of ghost guns and investigative considerations. Though there have been increased calls to regulate guns in the wake of numerous mass shootings the proliferation of ghost guns and their increasing use in crimes would likely require additional laws and regulatory measures. Since there are few knowledgeable firearm practitioners in the field who can render qualified opinions on the subject author Robb Walker has taken a practical pragmatic approach to the topic. The book defines terminology provides photographs and explains the concepts surrounding homemade firearm in clear easy to understand terms. Key Features Addresses the technology and technical aspects in creating assembling and or modifying homemade firearms both printable and assembled from pre fabricated components.
