social and cultural scholarly research In Digital Methods Richard Rogers proposes a methodological outlook for social and cultural scholarly research on the Web that seeks to move Internet research beyond the study of online culture It is not a toolkit for Internet research or operating instructions for a software package it deals with broader questions How can we study social media to learn something about society rather than about social media use Rogers proposes repurposing Web native techniques for research into cultural change and societal conditions We can learn to reapply such methods of the medium as crawling and crowd sourcing PageRank and similar algorithms tag clouds and other visualizations we can learn how they handle hits likes tags date stamps and other Web native objects By thinking along with devices and the objects they

handle digital research methods can follow the evolving methods of the medium Rogers uses this new methodological outlook to examine such topics as the findings of inquiries into 9 11 search results the recognition of climate change skeptics by climate change related Web sites and the censorship of the Iranian Web With Digital Methods Rogers introduces a new vision and method for Internet research and at the same time applies them to the Web s objects of study from tiny particles hyperlinks to large masses social media
