EBOOK: Applied Calculus for Business, Economics and the Social and Life Sciences, Expanded Edition Laurence Hoffmann, Gerald Bradley, David Sobecki, Michael Price, 2012-02-16 Applied Calculus for Business Economics and the Social and Life Sciences Expanded Edition provides a sound intuitive understanding of the basic concepts students need as they pursue careers in business economics and the life and social sciences Students achieve success using this text as a result of the author's applied and real world orientation to concepts problem solving approach straight forward and concise writing style and comprehensive exercise sets More than 100 000 students worldwide have studied from this text Technologies in Biomedical and Life Sciences Education Harry J. Witchel, Michael W. Lee, 2022-06-24 This contributed volume focuses on understanding the educational strengths and weaknesses of mediated content including media as a learning supplement in comparison to traditional face to face learning Each chapter includes research on and a broad brush summary of approaches to combining life sciences education with educational technologies The chapters are organized into four main sections each of which focuses on a key question regarding the consequences of incorporating media into education In this regard the authors highlight how educational technology is both a bridge and barrier to student access and inclusivity Further they address the ongoing discussion as to whether students need to be present for lectures and on how having agency in their own learning can improve both retention and conceptual understanding To link the content to current events the authors also shed light on the impact that the COVID 19 pandemic is having on the continuity of educational programs and on the growing importance of educational technologies Consequently the book offers life science educators valuable guidance on the technologies already available and an outlook on what is yet to come *Discovery-Based Learning in the Life Sciences* Kathleen M. Susman, 2015-09-28 For nearly a decade scientists educators and policy makers have issued a call to college biology professors to transform undergraduate life sciences education As a gateway science for many undergraduate students biology courses are crucial to addressing many of the challenges we face such as climate change sustainable food supply and fresh water and emerging public health issues While canned laboratories and cook book approaches to college science education do teach students to operate equipment make accurate measurements and work well with numbers they do not teach students how to take a scientific approach to an area of interest about the natural world Science is more than just techniques measurements and facts science is critical thinking and interpretation which are essential to scientific research Discovery Based Learning in the Life Sciences presents a different way of organizing and developing biology teaching laboratories to promote both deep learning and understanding of core concepts while still teaching the creative process of science In eight chapters the text guides undergraduate instructors in creating their own discovery based experiments The first chapter introduces the text delving into the necessity of science education reform The chapters that follow address pedagogical goals and desired outcomes incorporating discovery based laboratory experiences realistic constraints on such

lab experiments model scenarios and alternate ways to enhance student understanding The book concludes with a reflection on four imperatives in life science research climate food energy and health and how we can use these laboratory experiments to address them Discovery Based Learning in the Life Sciences is an invaluable guide for undergraduate instructors in the life sciences aiming to revamp their curriculum inspire their students and prepare them for careers as educated global citizens

Uskov,2014-06-23 The interdisciplinary field of smart digital systems is crucial to modern computer science encompassing artificial intelligence information systems and engineering For over a decade the mission of KES International has been to provide publication opportunities for all those who work in knowledge intensive subjects The conferences they run worldwide are aimed at facilitating the dissemination transfer sharing and brokerage of knowledge in a number of leading edge technologies _x000D_ This book presents some 80 papers selected after peer review for inclusion in three KES conferences held as part of the Smart Digital Futures 2014 SDF 14 multi theme conference in Chania Greece in June 2014 The three conferences are Intelligent Decision Technologies KES IDT 14 Intelligence Interactive Multimedia Systems and Services KES IIMSS 14 and Smart Technology based Education and Training KES STET 14 _x000D_ The book will be of interest to all those whose work involves the development and application of intelligent digital systems

Undergraduate Mathematics for the Life Sciences Glenn Ledder,Jenna P. Carpenter,Timothy D. Comar,2013 There is a gap between the extensive mathematics background that is beneficial to biologists and the minimal mathematics background biology students acquire in their courses The result is an undergraduate education in biology with very little quantitative content New mathematics courses must be devised with the needs of biology students in mind In this volume authors from a variety of institutions address some of the problems involved in reforming mathematics curricula for biology students The problems are sorted into three themes Models Processes and Directions It is difficult for mathematicians to generate curriculum ideas for the training of biologists so a number of the curriculum models that have been introduced at various institutions comprise the Models section Processes deals with taking that great course and making sure it is institutionalized in both the biology department as a requirement and in the mathematics department as a course that will live on even if the creator of the course is no longer on the faculty Directions looks to the future with each paper laying out a case for pedagogical developments that the authors would like to see
