**Handbook of Literacy in Africa** R. Malatesha Joshi, Catherine A. McBride, Bestern Kaani, Gad Elbeheri, 2023-07-28 This volume highlights the shortcomings concerning literacy development in Africa and collates the current available literature based on empirical research in various countries in a coherent manner Further emphasized is how the current research can guide practical information to improve the literacy situation in Africa The research studies will encompass various fields such as linguistics neurosciences and education and will provide future research directions and instructional recommendations to improve the literacy situation in Africa      Towards a holistic approach to support learners at risk of interrupted

development Macalane J. Malindi, Johnnie Hay, Thabo Makhalemele, 2024-02-23 The COVID 19 pandemic and the restrictions that came with it led to unprecedented disruptions in learner development and put them at risk of poor developmental outcomes It is thus important that the extent of the disruption on their development and the support needs of learners be investigated Researching the impact of the disruption should focus on holistic development In this book the authors use multiple research approaches and methods of gathering data in their respective fields to examine the impact of the disruption and determine the support needs of learners Data gathered through the different methods are processed and findings are presented The findings have implications for both practice and future research in the fields of inclusive education learner support educational psychology movement education Life Orientation and curriculum development

**The People's Paper** Peter Limb, 2012-09-01 This much awaited volume uncovers the long lost pages of the major African multilingual newspaper Abantu Batho Founded in 1912 by African National Congress ANC convenor Pixley Seme with assistance from the Swazi Queen it was published up until 1931 attracting the cream of African politicians journalists and poets Mqhayi Nontsisi Mkgqeth and Grendon In its pages burning issues of the day were articulated alongside cultural by ways The People s Paper comprising both essays and an anthology explores the complex movements and individuals that emerged in the almost twenty years of its publication The essays contribute rich new material to provide clearer insights into South African politics and intellectual life The anthology unveils a judicious selection of never before published columns from the paper spanning every year of its life and drawn from repositories on three continents Abantu Batho had a regional and international focus and by examining all these dynamics across boundaries and disciplines The People s Paper transcends established historiographical frontiers to fill a lacuna that scholars have long lamented      **Teaching Mathematical**

**Reasoning in Secondary School Classrooms** Karin Brodie, 2009-10-08 For too many students mathematics consists of facts in a vacuum to be memorized because the instructor says so and to be forgotten when the course of study is completed In this all too common scenario young learners often miss the chance to develop skills specifically reasoning skills that can serve them for a lifetime The elegant pages of Teaching Mathematical Reasoning in Secondary School Classrooms propose a more positive solution by presenting a reasoning and discussion based approach to teaching mathematics emphasizing the

connections between ideas or why math works The teachers whose work forms the basis of the book create a powerful record of methods interactions and decisions including dealing with challenges and impasses involving this elusive topic And because this approach shifts the locus of authority from the instructor to mathematics itself students gain a system of knowledge that they can apply not only to discrete tasks relating to numbers but also to the larger world of people and the humanities A sampling of the topics covered Whole class discussion methods for teaching mathematics reasoning Learning mathematical reasoning through tasks Teaching mathematics using the five strands Classroom strategies for promoting mathematical reasoning Maximizing student contributions in the classroom Overcoming student resistance to mathematical conversations Teaching Mathematical Reasoning in Secondary School Classrooms makes a wealth of cutting edge strategies available to mathematics teachers and teacher educators This book is an invaluable resource for researchers in mathematics and curriculum reform and of great interest to teacher educators and teachers *The African Book Publishing Record* ,2008
