Search for Entrepreneurship Simon Bridge,2016-12-08 Since the 1980s governments have often sought to encourage entrepreneurship on the assumption that it creates small businesses as the primary drivers of job creation As a result entrepreneurship has become a valid subject for academic research attracting extensive funding Despite this explosion of scholarship there is no accepted model of how entrepreneurship operates or even a commonly accepted definition of what it is Simon Bridge posits that this is because entrepreneurship has been studied based on the false assumption that it exists as a specific discrete identifiable phenomenon operating in accordance with consistent predictable rules So this misdirected search has produced more questions than answers Accepting that entrepreneurship as we have conceived it does not exist could lead to new and valuable insights into what the different forms of entrepreneurship are and how they might be influenced Scholars advanced students and policy makers will find this a thought provoking insight into the misconceptions

The Case against Education Bryan Caplan, 2019-08-20 Why we need to stop wasting public funds on education Despite being immensely popular and immensely lucrative education is grossly overrated Now with a new afterword by Bryan Caplan this explosive book argues that the primary function of education is not to enhance students skills but to signal the qualities of a good employee Learn why students hunt for easy As only to forget most of what they learn after the final exam why decades of growing access to education have not resulted in better jobs for average workers how employers reward workers for costly schooling they rarely ever use and why cutting education spending is the best remedy Romantic notions about education being good for the soul must yield to careful research and common sense The Case against Education points the way Cambridge Economics in the Post-Keynesian Era Ashwani Saith, 2022-11-11 This book chronicles the rise and especially the demise of diverse revolutionary heterodox traditions in Cambridge theoretical and applied economics investigating both the impact of internal pressures within the faculty as also the power of external ideological and political forces unleashed by the global dominance of neoliberalism Using fresh archival materials personal interviews and recollections this meticulously researched narrative constructs the untold story of the eclipse of these heterodox and post Keynesian intellectual traditions rooted and nurtured in Cambridge since the 1920s and the rise to power of orthodox mainstream economics Also expunged in this neoclassical counter revolution were the structural and radical policy oriented macro economic modelling teams of the iconic Department of Applied Economics along with the atrophy of sociology development and economic history from teaching and research in the self purifying faculty This book will be of particular interest to researchers in the history of economic thought sociology of knowledge political economy especially those engaged in heterodox and post Keynesian economics and to everyone wishing to make economics fit for purpose again for negotiating the multiple economic social and environmental crises rampant at national and global levels *The Flight of Icarus* Yiannis Drossos, 2020-12-10 This book provides a detailed analysis of the institutional transformations brought about by the financial crisis focusing on the institution building course of Europe and the Constitution bending course in several Member States It discusses the seemingly contradictory interplay between national and European institutions and the law resulting from the crisis arguing that the anti crisis exceptionality constitutes the matrix of the new normality of the reformed European economic governance The author carries out a critical analysis of the new economic governance and its case law with regular reference to relevant political episodes key economic figures and to the hitherto lax modes and rules The author also offers deep insights into the Greek adjustment programme and the crisis related Greek and Portuguese constitutional case law

presented in comparison with the German and French case law The book concludes with a critical overview of the profound mutations in the role of national Constitutions instigated by the new European economic governance and the emergence of a democratically deficient meta constitutional mode of functioning of both the European institutions and national Constitutions
