### **On the Gender Performance Gap in Economics**

**Education** Jens K. Perret,2022-11-30 Broad ranges of studies have discussed the difference in performance between men and women in relation to their economics education The German perspective with its particular tertiary education system and decade long history of gender equality movements however remain under researched By implementing two data sets a German public university and a German private university of applied sciences this study aims to provide to the existing literature in this regard The datasets have been used to test in a nationwide sample potential gender differences in the outcome of exams in basic economics By consisting of a total of more than 9 000 observations over nine years or 18 semesters and seven locations across Germany the study constructs a comprehensive view of the German academic landscape The results as well as robustness checks show that gender effects are marginal at best Additionally it has been shown that no significant differences exist across the different forms of universities The results of this broadband sample lead to the conjecture that in Germany independent of the type of university over the last decades gender equality in economics education has been consolidated and any observed effects are due to external factors alone

*Failure Up Close* Jay P. Greene,Michael Q. McShane,2018-01-17 For many reasons failure in education reform is rarely admitted Even though it is incredibly hard work to try and improve the enormous and diverse American education system because there are political consequences of admitting that a particular effort did not live up to its promises and pressure from philanthropic funders to show success unsuccessful efforts are often swept under the rug or papered over with public relations efforts that avoid wrestling with the tough realities of educational improvement This doesn't help anyone As any educator will tell you failure is an essential part of learning Insofar as education reform needs to be a learning movement itself it has to be able to admit where it has failed and learn from it Failure Up Close engages a select group of scholars from across the ideological spectrum to examine particular education reform efforts of recent years that have not succeeded and offer lessons for school and system improvement that can be learned from them Rather than view failure as negative this volume looks at failure as an opportunity to learn and grow In fact the editors endeavored to find authors that would analyze reforms for which they had
