**Accounting for Social Risk Factors in Medicare Payment** National Academies of Sciences, Engineering, and Medicine, Institute of Medicine, Board on Health Care Services, Board on Population Health and Public Health Practice, Committee on Accounting for Socioeconomic Status in Medicare Payment Programs, 2016-01-12 Recent health care payment reforms aim to improve the alignment of Medicare payment strategies with goals to improve the quality of care provided patient experiences with health care and health outcomes while also controlling costs These efforts move Medicare away from the volume based payment of traditional fee for service models and toward value based purchasing in which cost

control is an explicit goal in addition to clinical and quality goals Specific payment strategies include pay for performance and other quality incentive programs that tie financial rewards and sanctions to the quality and efficiency of care provided and accountable care organizations in which health care providers are held accountable for both the quality and cost of the care they deliver Accounting for Social Risk Factors in Medicare Payment Identifying Social Risk Factors is the first in a series of five reports commissioned to provide input into whether socioeconomic status SES and other social risk factors could be accounted for in Medicare payment and quality programs This report focuses on defining SES and other social factors for the purposes of application to Medicare quality measurement and payment programs *Curing Medicare* Andy Lazris,2016-06-14 Andy Lazris MD is a practicing primary care physician who experiences the effects of Medicare policy on a daily basis As a result he believes that the way we care for our elderly has taken a wrong turn and that Medicare is complicit in creating the very problems it seeks to solve Aging is not a disease to be cured it is a life stage to be lived Lazris argues that aggressive treatments cannot change that fact but only get in the way and decrease quality of life Unfortunately Medicare s payment structure and rules deprive the elderly of the chance to pursue less aggressive care which often yields the most humane and effective results Medicare encourages and will pay more readily for hospitalization than for palliative and home care It encourages and pays for high tech assaults on disease rather than for the primary care that can make a real difference in the lives of the elderly Lazris offers straightforward solutions to ensure Medicare s solvency through sensible cost effective plans that do not restrict patient choice or negate the doctor patient relationship Using both data and personal stories he shows how Medicare needs to change in structure and purpose as the population ages the physician pool becomes more specialized and new medical technology becomes available *Curing Medicare* demonstrates which medical interventions medicines tests procedures work and which can be harmful in many common conditions in the elderly the harms and benefits of hospitalization the current culture of long term care and how Medicare often promotes care that is ineffective expensive and contrary to what many elderly patients and their families really want *ECSM2016-Proceedings of the 3rd European Conference on Social Media* Christine Bernadas,Delphine Minchella,2016-06-21 [Title 42 Public Health Parts 414 to 429](#) (Revised as of October 1, 2013) Office of The Federal Register, Enhanced by IntraWEB, LLC,2013-10-01 42 CFR Public Health **Local Boards of Education Report on Salary and Travel for the Fiscal Year Ended ...** Georgia.
