The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near

universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

Psychology and Mathematics Education Gila Hanna,Laura Macchi,Karin Binder,Laura Martignon,Katharina Loibl,2023-09-05 Modern Mathematics is constructed rigorously through proofs based on truths which are either axioms or previously proven theorems Thus it is par excellence a model of rational inquiry Links between Cognitive Psychology and Mathematics Education have been particularly strong during the last decades Indeed the Enlightenment view of the rational human mind that reasons makes decisions and solves problems based on logic and probabilities was shaken during the second half of the twentieth century Cognitive psychologists discovered that humans thoughts and actions often deviate from rules imposed by strict normative theories of inference Yet these deviations should not be called errors as Cognitive Psychologists have demonstrated these deviations may be either valid heuristics that succeed in the environments in which humans have evolved or biases that are caused by a lack of adaptation to abstract information formats Humans as the cognitive psychologist and economist Herbert Simon claimed do not usually optimize but rather satisfice even when solving problem This Research Topic aims at demonstrating that these insights have had a decisive impact on Mathematics Education We want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program In Simon s bounded rationality and its direct descendant ecological rationality rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content free norms of coherence e g transitivity

The Boy Crisis Warren Farrell,John Gray,2018-03-13 What is the boy crisis It s a crisis of education Worldwide boys are 50 percent less likely than girls to meet basic proficiency in reading math and science It s a crisis of mental health ADHD is on the rise And as boys become young men their suicide rates go from equal to girls to six times that of young women It s a crisis of fathering Boys are growing up with less involved fathers and are more likely to drop out of school drink do drugs become delinquent and end up in prison It s a crisis of purpose Boys old sense of purpose being a warrior a leader or a sole breadwinner are fading Many bright boys are experiencing a purpose void feeling alienated withdrawn and addicted to immediate gratification So what is The Boy Crisis A comprehensive blueprint for what parents teachers and policymakers can do to help our sons become happier healthier men and fathers and leaders worthy of our respect

The School Reform Landscape Reloaded Christopher H. Tienken,2020-10-30 The School

Reform Landscape Reloaded More Fear Myths and Lies peels back the curtain of school reform to examine the tensions that exist between the democratic and equitable system of public education and the emerging dual system based on elite interests aimed at profit making and decreasing education equity The author takes in depth and controversial look at school reform since the launch of Sputnik I Education reform events proposals and policies are examined through the lens of progressivist philosophy and critical social theory Some of the issues and policies critiqued include the neoliberal corporate influence on education the Sputnik myth A Nation At Risk standardization charter schools and other relevant topics The author provides an evidence based view of the free market reform ideas and he pierces the veil of the new reform policies to find that they are not built upon empirical evidence but instead rest solidly on foundations of myth fear and lies Ideas for a new set of reform policies based on empirical evidence and supportive of a unitary equitable and democratic system of education are presented

Assessing the Nation's Report Card Chester E. Finn, 2022-08-23 Assessing the Nation's Report Card examines the history of the National Assessment of Educational Progress NAEP and outlines plans for improving and modernizing the organization Educational policy analyst Chester E Finn Jr imparts a rare inside analysis of the evolution of the NAEP program

at key moments in its history and provides a firsthand perspective of crucial decisions and core goals that have helped shape it. The result is a revealing survey of the US's most influential source of data on K-12 achievement. Assessing the Nation's Report Card offers readers an in-depth understanding and appreciation of NAEP as well as an examination of its shortcomings, its controversies, and its current issues. The book explores why NAEP is considered the gold standard of educational assessments yet is much lesser known than other types of standardized testing. Finn underscores the promise of applying the results in addressing achievement gaps, boosting federal accountability, and driving education reform and policy. He also discloses how the data are collected and what the results can and cannot tell us. For more than 50 years, this ambitious federal testing program has informed the decisions of policy makers and educational leaders as they advocate for educational improvements in the US. Acknowledging the nation's evolving need for actionable information about students and schools, Finn provides an assured and rare overview of the existing program and proposes possibilities for the future.

An Age of Accountability John L. Rury, 2023-10-13. *An Age of Accountability* highlights the role of test-based accountability as a policy framework in American education from 1970 to 2020. For more than half a century, the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment. The theory of change embedded in almost all test-based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools. This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps, which repeatedly failed to materialize. But even after very clear disappointments, no other policy framework has emerged to challenge its hegemony. The American public today has little confidence in institutions to improve the quality of goods and services they provide, especially in the public sector. As a consequence, many Americans continue to believe that accountability remains a vital necessity, even if educators and policy scholars disagree.

Localization and Quality Assessment of Project-Based Learning in China Xuemei Xia, 2025-09-17. This book provides a systematic assessment of the quality of Project-Based Learning (PBL) and proposes a diagnostic criteria framework for evaluating project design and implementation. It identifies key characteristics that vary as a result of differentiation. The book offers a feasible framework for implementing competency-based teaching on an international scale, drawing from our long-term exploration in China to address shortcomings in Chinese education. Furthermore, it delineates the boundaries and limitations of project-based design, facilitating professional learning in its implementation. Educational practitioners will gain multidimensional perspectives to develop their capacities and critically reflect on PBL's impact on students' learning processes.
