Mobile Broadband Communications for Public Safety Ramon Ferrús, Oriol Sallent, 2015-08-07 This book provides a timely and comprehensive overview of the introduction of LTE technology for PPDR communications. It describes the operational scenarios and emerging multimedia and data centric applications in demand and discusses the main technological drivers that are believed to be pivotal for an efficient and cost effective delivery of mobile broadband PPDR communications. The capabilities and features of the LTE standard for improved support of mission critical communications e.g. proximity services, group communications are covered in detail. Also different network implementation options to deliver mobile broadband PPDR communications services over dedicated or commercial LTE based networks are discussed including the applicability of the Mobile Virtual Network Operator (MVNO) model and other hybrid models. Radio spectrum matters are also discussed in depth, outlining spectrum needs and providing an outlook into allocated and candidate spectrum bands for PPDR communications and suitable dynamic spectrum sharing solutions in PPDR communications. Explanations are accompanied by a vast collection of references that allow the more intrigued reader to gain further insight into the addressed topics.

International Anti-Corruption Norms Cecily Rose, 2015-08-13 This book traces the creation of international anti corruption norms by states and other actors through four markedly different institutions: the Organisation for Economic Co-operation and Development, the United Nations, the Extractive Industries Transparency Initiative and the Financial Action Task Force. Each of these institutions oversees an international instrument that requires states to combat corruption. Yet only the United Nations oversees anti corruption norms that take the sole form of a binding multilateral treaty. The OECD has by contrast fostered the development of the binding 1997 OECD Anti Bribery Convention as well as non binding recommendations and guidance associated with treaty itself. In addition, the revenue transparency and anti money laundering norms developed through the Extractive Industries Transparency Initiative and the Financial Action Task Force respectively take the form of non binding instruments that have no relationship with multilateral treaties. The creation of international anti corruption norms through non binding instruments and informal institutions has the potential to privilege the interests of powerful states in ways that raise questions about the normative legitimacy of these institutions and the instruments they produce. At the same time, the anti corruption instruments created under the auspices of these institutions also show that non binding instruments and informal institutions carry significant advantages. The non binding instruments in the anti corruption field have demonstrated a capacity to influence domestic legal systems that is comparable to if not greater than that of binding treaties. With corruption and money laundering at the forefront of political debate, *International Anti Corruption Norms* provides timely expertise on how states and international institutions grapple with these global problems. *Pulp, Paper and Board* Business and Defense Services Administration, 1967

A Leader's Destiny Elias Aboujaoude, 2024-05-21 A psychiatrist puts leadership on the couch

with a provocative exploration of its crucial often ignored psychological and personal character foundations Elias Aboujaoude's distinctive exploration of leadership explains how our cultlike obsession with leadership gives narcissists and sociopaths an edge and results in leadership failure everywhere we look and how resisting the imperative to rise at all costs leaves many with an inferiority complex His takedown of the leadership industrial complex pokes a very sharp elbow into an industry seemingly united in a modern form of alchemy to create leadership gold a waste of time and money Aboujaoude vividly illustrates since leaders emerge from a unique combination of personal psychological and situational factors that cannot be easily controlled or manipulated no matter how gifted the executive coach This bracing take on a classic subject provides new insight into the way psychology aligns with the requirements of effective and happy leadership The result is to empower us to understand ourselves and step up if we have what it takes to lead or find equally rewarding often superior ways to achieve fulfillment if we don't
