**An International Perspective** Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills

**Research Methods for Understanding Professional Learning** Elaine Hall, Kate Wall, 2019-02-21 Practitioners are experts in their field and this book introduces research methods that help to make that expertise explicit There is worldwide recognition of the importance of high quality reflective practice that both engages with existing research evidence and engages in the production of new evidence Research Methods for Understanding Professional Learning demonstrates how the knowledge about what happens in a practice context and the skills used to succeed there can be used as the building blocks for developing research methods and tools to best investigate practice The experienced author team introduce a framework for understanding practice and for designing research about practice using a wealth of real research examples across all phases of education This practical guide provides suggestions of a unique mix of research methods and tools moving beyond just action research methodology allowing the reader to engage with research design and assess how well the data gathered will answer their research question

**Make History** Art Worrell, Paul Bambrick-Santoyo, 2023-05-09 Make History with Your Students From bestselling author Paul Bambrick Santoyo and Art Worrell Uncommon Schools Director of History Instruction comes Make History an inspiring book on how educators can take history instruction to the next level History teachers face unique challenges in introducing history lessons to students and they are under increasing pressure to get it right in an age

of social progress and social divisiveness This book is a guide to bring the past to life while teaching students how to make sense of history Use the ideas and techniques to turn your history students into writers readers and thinkers who are ready not only to succeed in college but also to become leaders and change agents By showing how to teach rigorous engaging lessons that center student thinking and voice Make History turns history class into the most exciting part of a student s day Reimagine history education to help students build their own unique arguments about the past Ask tough questions to help students grapple with difficult historical periods Set the stage for authentic discourse that students remember long past the bell Give students the tools to become socially aware build their own identity and think and write like historians Teachers and instructional coaches in grades 5 12 will love this new insightful approach to history one that works for today s classrooms

Brown,2013-06-13 How do calendars and clocks influence considerations of school effectiveness From the creation of compulsory education to the future of virtual schooling Weiss and Brown trace two centuries of school practices policies and research linking the concept of time with opportunity to learn School calendars and clocks are shaped by both the physical and social worlds and the clock of schooling is shown to be one of the great clocks of society that helps to frame school effectiveness School time does not operate in a vacuum but within curriculum teaching and learning situations The phrase chrono curriculum was devised by the authors as a metaphor for exploring issues of school effectiveness within the time dimension Using American and Canadian sources stories are created to illustrate four themes about time and school effectiveness The first three stories utilize access attendance and testing as criteria associated with these eras of schooling How will the story read in the fourth era the digital age which forces us to a reconsideration of time and its influence on education Quoting David Berliner in his Foreword this is an opportune time for these authors to bring us insights into the reasons we in North America created our public school systems and how the chrono curriculum influences those systems The authors presentation of our educational past provides educators a chance to think anew about how we might do schooling in our own times

**Improving Thinking in the Classroom** Keith J. Topping,2023-12-05 Programs like philosophy for children reciprocal teaching problem based learning and computerized games can help students critical and creative thinking skills but which are most effective This research to practice book showcases how you can improve the thinking cognition of your students across the curriculum and beyond Each chapter focuses on a particular program describes the method and background research offers examples and explains key processes in implementation You ll learn about thinking programs within a subject across the curriculum outside the curriculum and

those which can be either within or outside the curriculum so you can choose a program which suits your context You ll also find out what to consider when evaluating a thinking skills program And finally you ll discover shared features of the methods such as peer interaction discourse argumentation scaffolding and transfer so you can see the commonalities of the programs and think about designing your own approaches Whether you re a classroom teacher department head or other key stakeholder this powerful resource will help you determine what really works for teaching thinking so your students can apply such skills and thrive long after they ve left school Note This book is part of a set a companion book focuses on programs for teaching metacognition or thinking about thinking      **Creating An Accelerated Learning School** Mark Lovatt,2001-06-01 This book describes how an ordinary high school set about incorporating accelerated learning into its teaching practices and policies Headteacher Derek Wise provides a macro view of the process discussing the changes made across the whole school Head of Science Mark Lovatt provides a micro view looking at ways to use accelerated learning in the classroom Their experiences provide useful reading for any school wishing to improve the learning quality of its students Several case studies are included to show how accelerated learning techniques can be applied to different subjects      The Publishers' Circular ,1867      **The Course of Study** ,1900      The Teaching of English Ian Michael,1987-05-21 Not only academic educationalists interested in the history of the curriculum but teachers from primary schools to University will find this book of compelling interest
