The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

The Bank Culture Debate Huw Macartney, 2019-09-12 The period since the Global Financial Crisis and numerous scandals have exposed some areas of serious illegal and unethical conduct within western banking systems Despite extensive reforms it is increasingly apparent however that there is a persistent problem with the culture of banking in Anglo America US and UK state managers made substantial efforts to reform the culture of their banking sectors However this book argues that they focused on an extremely narrow definition of bank culture They did so for two reasons firstly because the structural pressures of financialization which are a far more important driver of the problematic features of bank culture in Anglo America are harder to remedy but secondly state managers also used their bank culture response to tackle a legitimacy crisis facing their institutions of government In so doing they abdicated responsibility for the real problems of inequality and instability associated with their respective financial systems Drawing on interviews with more than 150 individuals working in financial services as well as regulators politicians and lawyers *The Bank Culture Debate* explains the strategies employed

by state managers before then examining what has and has not changed in the culture of banking in the US and UK

Race, Class, and Affirmative Action Sigal Alon, 2015-11-17 No issue in American higher education is more contentious than that of race based affirmative action In light of the ongoing debate around the topic and recent Supreme Court rulings affirmative action policy may be facing further changes As an alternative to race based affirmative action some analysts suggest affirmative action policies based on class In *Race Class and Affirmative Action* sociologist Sigal Alon studies the race based affirmative action policies in the United States and the class based affirmative action policies in Israel Alon evaluates how these different policies foster campus diversity and socioeconomic mobility by comparing the Israeli policy with a simulated model of race based affirmative action and the U S policy with a simulated model of class based affirmative action Alon finds that affirmative action at elite institutions in both countries is a key vehicle of mobility for disenfranchised students whether they are racial and ethnic minorities or socioeconomically disadvantaged Affirmative action improves their academic success and graduation rates and leads to better labor market outcomes The beneficiaries of affirmative action in both countries thrive at elite colleges and in selective fields of study As Alon demonstrates they would not be better off attending less selective colleges instead Alon finds that Israel s class based affirmative action programs have provided much needed entry slots at the elite universities to students from the geographic periphery from high poverty high schools and from poor families However this approach has not generated as much ethnic diversity as a race based policy would By contrast affirmative action policies in the United States have fostered racial and ethnic diversity at a level that cannot be matched with class based policies Yet class based policies would do a better job at boosting the socioeconomic diversity at these bastions of privilege The findings from both countries suggest that neither race based nor class based models by themselves can generate broad diversity According to Alon the best route for promoting both racial and socioeconomic diversity is to embed the consideration of race within class based affirmative action Such a hybrid model would maximize the mobility benefits for both socioeconomically disadvantaged and minority students *Race Class and Affirmative Action* moves past political talking points to offer an innovative evidence based perspective on the merits and feasibility of different designs of affirmative action
