Math for Everyone Combo Book Nathaniel Max Rock,2007-07 Each years content in six math courses is boiled down into its essential vocabulary and five to seven key concepts with particular attention paid to clarity and articulation between courses Education Teaching *The Best Book On Elite Admissions (Former Stanford Admissions Officer's Plan For Select College Admissions)* Erinn Andrews,2011-11-17 ABOUT THE BOOK Applying to college is likely the most stressful and important moment in a teenager s academic life Pressure from friends family teachers and oneself add up to make this an overwhelming process to go through especially for students applying to the nation s most selective schools One major reason for this stress is the uncertainty of the application process Often the students who apply to top schools are used to feeling in control of their lives and planning their future but because there are no sure admittances in elite admissions the feeling of helplessness can be overwhelming There are a number of resources available to students who wish to maximize their chances of admission however I as a former admission officer at a selective university feel that many are misleading In some cases the advice given is very specific to one school which isn t useful for the majority of students or it s too vague And in some other cases students try to compare their statistics with the statistics of other seemingly similar students to gauge their chances of admission perhaps the worst resource of all MEET THE AUTHOR Erinn Andrews is the former Assistant Director of Undergraduate Admissions at Stanford University She read and evaluated thousands of applications from the US as well as more than 70 countries around the world and through that she has developed a unique perspective on what it takes to get into the nation s elite colleges She completed an M A in Education at Stanford University s School of Education in the Policy Organization and Leadership Studies Program She also earned a B A in History with Honors at Stanford She now works with students to help them uncover their intellectual and personal interests and present the best version of themselves in the elite admissions process EXCERPT FROM THE BOOK The purpose of the application in selective admissions is to understand the context from which the applicant is coming In order to decide which students to admit when admit rates are so low Once the context has been established then the admission officer tries to find out if the student has taken advantage of the opportunities available to him and has either a made a lasting impact in his community in some way or b has the potential to make a lasting impact in his future community college and beyond Despite popular belief every application is actually read in its entirety by an admission officer in the selective admissions process *Contemporary Issues in Mathematics Education* Estela A. Gavosto,Steven G. Krantz,William McCallum,1999-06-13 This volume presents a serious discussion of educational issues with representations of opposing ideas **Selected writings from the Journal of the British Columbia Association of Mathematics Teachers** Egan J Chernoff,Peter Liljedahl,Sean Chorney,2016-06-01 The teaching and learning of mathematics in British Columbia has a long and storied history An integral part of the past 50 years 1962 2012 of this history has been Vector Journal of the British Columbia Association of Mathematics Teachers This volume which presents

ten memorable articles from each of the past five decades that is 50 articles from the past 50 years of the journal provides an opportunity to share this rich history with a wide range of individuals interested in the teaching and learning of mathematics and mathematics education Each decade begins with an introduction providing a historical context and concludes with a commentary from a prominent member of the British Columbia mathematics education community As a result this monograph provides a historical account as well as a contemporary view of many of the trends and issues in the teaching and learning of mathematics This volume is meant to serve as a resource for a variety of individuals including teachers of mathematics mathematics teacher educators mathematics education researchers historians and undergraduate and graduate students Most importantly this volume is a celebratory retrospective on the work of the British Columbia Association of Mathematics Teachers
