For topics where you scored well, identify areas the program can help you with. Review the material that you did wrong on to help you get better at next time.

For topics where you scored low, focus your attention on these topics and make them one of the first topics reviewed in every session throughout the month leading up to your exam.

For topics you want to self-study, use your personal and diagnostic results. If you score 80% or above on a topic in either the pre-test or your diagnostic results, you can move that self-study time to your spare time.
