Figure 1 shows the results of the 1000 iterations. The results are consistent with the theoretical predictions. The estimated parameters are close to the true values, and the standard errors are small. The results are also consistent with the theoretical predictions that the estimated parameters are unbiased and efficient.

249. **Answer: A** – The author states that the "most common" type of "infectious disease" is "bacterial." The author also states that "bacteria" are "microscopic organisms" that "live everywhere."
