**Mastering Self-Motivation** Michael J. Provitera, 2012-12-07 The surge of motivational titles flooding bookstore shelves amid the worst economic crisis since the Great Depression is evidence of our society's growing obsession with self improvement Recently two areas of growing interest among academics have been positive organizational behavior and psychological capital While books on these subjects have led to a new understanding of motivation they have limited their focus to two ends of a continuum This book pays heed to the extensive research and careful conclusions of academicians and then crosses into the realm of self help and massmarket literature It has nine chapters that blend topics being taught over two decades in the classroom and practiced in management consulting Each chapter invites you to learn both theoretical and practical concepts and encourages you to apply this knowledge to the workplace This book thus seeks to mediate market driven self help dreams and academic literature and provides theoretical concepts that can enhance individual motivation presented in a comprehensive and enjoyable manner This is the first motivational book that brings together the academic and popular literature to bridge the gap between common sense and theoretical concepts

Comprehensive coverage of critical issues related to information science and technology *Psyche of Asian Society* Aradhana Shukla, Anubhuti Dubey, Narendra Singh Thagunna, 2019-01-01 Every culture has its own values and of course they are different in every walk of life with more or less magnitude We can see a lot of variation in two cultures in regard to their way of thought way of behaviour parameters and so many other things Asia is a big continent and it covers fourty eight countries in its roof These countries are somehow similar in traditions and behaviour performance and vice versa in some other respects of life But it is quite sure that there is a common thread that links them in one single garland The aim of this volume is to collect the gems from entire Asia and bring them on one platform There are twenty four articles in this volume They reveal various aspects of the particular country where the work is done Chapters are in theoretical and or in empirical mode and we hope that they will provide good insight to the readers to move on their interest and research The Future Opportunities and Challenges of Business in Digital Era 4.0 Satria Bangsawan, Mahrinasari MS, Ernie Hendrawaty, Rindu Gamayuni, Nairobi, Hendrati Dwi Mulyaningsih, Ani Wahyu Rachmawati, Santi Rahmawati, 2020-07-23 One of the main challenges faced by all entrepreneurs is the need to growth Growth is part of all organizations it implies continuous growth of sales purchases number of employees profit and thus the growth of the enterprise Most innovations that are part of the organizations are derived from the internal organization Industrial Revolution 4 0 provides both opportunities and challenges to all entrepreneurs to grow their business The rapid development of technology and all digital aspects create opportunities of innovation in organizations These proceedings provide details beyond what is possible to be included in an oral presentation and constitute a concise but timely medium for the dissemination of recent research results It will be invaluable to professionals and academics in the field of business entrepreneurship and economics to get an understanding of recent research developments **Gaining Control** Robert Aunger, Valerie Curtis, 2015-03-26 Gaining control tells the story of how human behavioral capacities evolved from those of other animal species Exploring what is known about the psychological capacities of other groups of animals the authors reconstruct a fascinating history of our own mental evolution In the book the authors see mental evolution as a series of steps in which new mechanisms for controlling behavior develop in different species starting with early representatives of this kingdom and leading to a species us that can engage in a large number of different types of behavioral control Key to their argument is the idea that each of these steps from reflexes to instincts drives emotions and cognitive planning can be seen as a novel type of psychological adaptation in which information is inherited by an animal from its own behavior through new forms of learning a form of major evolutionary transition Thus the mechanisms that result from these steps in increasingly complex behavioral control can also be seen as the fundamental building blocks of psychology Such a perspective on behaviour has a number of implications for practitioners in fields ranging from experimental psychology to public health Short provocative and insightful this book will be of great interest and

use to evolutionary psychologists and biologists anthropologists and the scientific community as a whole
