A red Eames-style chair and a blue backpack are positioned on a light-colored stone sidewalk. Behind them is a large window with a teal-colored frame. The window reflects a blurred city street scene, including a red car and other vehicles. The overall atmosphere is modern and urban.

SOCIAL SYSTEMS AND TRANSFORMATION OF SOCIETY Patrick K. Kalifungwa, 2025-03-19 All knowledge including the most basic taken for granted common sense knowledge of everyday reality is derived from and maintained by social interaction In their model people interact on the understanding that their perceptions of everyday life are shared with others and this common knowledge of reality is in turn reinforced by this interaction Social structure can also be said to be the framework upon which a society is established It determines the norms and patterns of relations between the various institutions of the society Social norms are believed to influence social structures through relations between the majority and

the minority As those who align with majority are considered normal and those who align with the minority are considered abnormal majority minority relations create a hierarchical stratification within social structures that favors the majority in all aspects of society Social theory by definition is used to make distinctions and generalizations among different types of societies and to analyze modernity as it has emerged in the past few centuries Social thought provides general theories to explain actions and behavior of society as a whole encompassing sociological political and philosophical ideas Social transformation in this context requires a shift in collective consciousness of a society local state national or global so that reality is refined by consensus This often happens by external stimulus and sometimes intentionally Social transformations are such when they sustain overtime where attitudes and values are held in a completely new context or paradigm based upon different assumptions and beliefs Mindset is an established set of attitudes especially regarded as typical of a particular group social or cultural values the outlook philosophy or values of a person now also more generally frame of mind attitude frechte and disposition A mindset may also arise from a person s world view or philosophy of life Ideas are just thoughts but implementing and acting on these ideas in our own lives is what will make it habitual and allowing a change in mind set

*Sociology of Crisis* Myrto Tsilimpounidi, 2016-11-03 The global financial crisis has demonstrated the impact and implications of late capitalism and its bedfellow globalisation In the European context crisis is seen as a threat to the stability of the region rather than a local or national concern Post 2008 crisis is social and political rather than merely financial as Western countries witness the consequences of consumption growth and profit In this book Tsilimpounidi demonstrates how sociologists must develop new approaches to examining rapid shifts in the social landscape since crisis is not merely reflected in balance sheets but is mediated through spectacular imagery of loss deprivation and increased vectors of marginalisation Providing focused and valuable insight into the pressing problems of those living in Greece in relation to the wider spheres of the nation and at the level of the European Union *Sociology of Crisis* takes an approach that is firmly located within a critical sociological appeal to reflexivity A timely engagement with the problem of crisis at a macro level and in dialogue with the everyday experiences of crisis on a micro level this interdisciplinary title will appeal to both undergraduate and postgraduate students interested in sociology social policy geography urban studies and research methods social science

**Principles of Subjective Anthropology** Binggong Chen, 2023-03-27 This book puts forward the concept of subjective anthropology and outlines a theoretical system that will allow subjective anthropology to qualify as a new academic discipline in its own right In an effort to respond to the field s proper role as the science of humanity subjective analysis has been introduced into the study of anthropology The book fills two distinct gaps in our knowledge and understanding of modern man offering detailed descriptions of personality and of groups while also advancing the theory of structure and choice The book formulates seven basic principles of subjective anthropology and divides anthropology into three major branches subjective anthropology cultural anthropology and biological or physical anthropology which can be

further divided into sub branches The book pursues three key goals advancing and developing the theoretical system of subjective anthropology reconstructing the discipline of anthropology and establishing a Chinese anthropology with Chinese characteristics Chinese visions and Chinese styles

**Sociology** John Ambenge,2021-03-15 The book features real life examples and amazing diversity focusing on sociology s unique ability to personally resonate well with students experiences Throughout the text the author carefully balances coverage of core topics and contemporary changes in society Every chapter explores unique topics such as same sex marriage Boko Haram mob justice Sharia law as well as issues of inequality related to race ethnicity gender social class and urbanization The text empowers students to use the lenses of sociological imagination to see sociology in everyday life Using sociological imagination theory and sociological perspectives the text helps students move beyond individual perspective to gain a sociological perspective

**STRUCTURE AND CHOICE** Chen Binggong,2021-04-05 This book employs the methods of philosophical anthropology to examine the question of what the noumenon of human life is which has been debated for thousands of years This work elaborates upon the noumenon of human life that is man s structure and choice The noumenon of human life differs essentially from the animals in bringing about the unity of structure and choice The noumenon of human life or rather man s structure and choice provides the motive force for the survival and development of individuals and groups families organizations and states as well as the basic ways in which human values can be possible of realization It is only through the instrumentality of man s structure and choice that humans can attain their goals and grasp the laws of development and change of things In passing criticism upon structuralism and existentialism the author tries to reconstruct the ontology of human life whereby his theory provides an ontological foundation for the humanities and social sciences a theoretical framework for an idealistic anthropological commitment to self transcendence a scientific philosophy of life for us and a good deal of enlightenment about many theoretical prerequisites
