Framing Europe Juan Díez Medrano,2021-07-13 This book provides a major empirical analysis of differing attitudes to European integration in three of Europe s most important countries Germany Spain and the United Kingdom From its beginnings the European Union has resounded with debate over whether to move toward a federal or intergovernmental system However Juan D ez Medrano argues that empirical analyses of support for integration by specialists in international relations comparative politics and survey research have failed to explain why some countries lean toward federalism whereas others lean toward intergovernmentalism By applying frame analysis to a unique set of primary sources in depth interviews newspaper articles novels history texts political speeches and survey data D ez Medrano demonstrates the role of major historical events in transforming national cultures and thus creating new opportunities for political transformation Clearly written and rigorously argued Framing Europe explains differences in support for European integration between the three countries studied in light of the degree to which each realized its particular supranational project outside Western Europe Only the United Kingdom succeeded in consolidating an empire and retaining it after World War II while Germany and Spain each abandoned their corresponding aspirations These differences meant that these countries populations developed different degrees of identification as Europeans and partly in consequence different degrees of support for the building of a federal Europe Ford Taurus & Mercury Sable Automotive Repair Manual Ken Layne,John Harold Haynes,Haynes,2001
