This book celebrates that important milestone and paints an exhaustively detailed picture of the people and personalities who have shaped this great sport. The Complete Book of the World Rally Champions provides a biographical account of the 65 men who have won at least one World Championship Rally since 1973. Physicist and amateur racer Chuck Edmondson thoroughly discusses the physics underlying car racing and explains just what's going on during any race why and how a driver can improve control and ultimately win. The world of motorsports is rich with excitement and competition and physics. Edmondson applies common mathematical theories to real world racing situations to reveal the secrets behind successful fast driving. He explains such key concepts as how to tune your car and why it matters how to calculate 0 to 60 mph times and quarter mile times and why they are important and where when why and how to use kinematics in road racing. He wraps it up with insight into the impact and benefit of green technologies in racing. In each case Edmondson's in depth explanations and worked equations link the physics principles to qualitative racing advice.
