Commercial Aircraft Propulsion and Energy Systems Research National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Aeronautics and Space Engineering Board, Committee on Propulsion and Energy Systems to Reduce Commercial Aviation Carbon Emissions, 2016-09-09 The primary human activities that release carbon dioxide CO₂ into the atmosphere are the combustion of fossil fuels coal natural gas and oil to generate electricity the provision of energy for transportation and as a consequence of some industrial processes Although aviation CO₂ emissions only make up approximately 2.0 to 2.5 percent of total global annual CO₂ emissions research to reduce CO₂ emissions is urgent because 1 such reductions may be legislated even as commercial air travel grows 2 because it takes new technology a long time to propagate into and through the aviation fleet and 3 because of the ongoing impact of global CO₂ emissions Commercial Aircraft Propulsion and Energy Systems Research develops a national research agenda for reducing CO₂ emissions from commercial aviation This report focuses on propulsion and energy technologies for reducing carbon emissions from large commercial aircraft single aisle and twin aisle aircraft that carry 100 or more passengers because such aircraft account for more than 90 percent of global emissions from commercial aircraft Moreover while smaller aircraft also emit CO₂ they make only a minor contribution to global emissions and many technologies that reduce CO₂ emissions for large aircraft also apply to smaller aircraft As commercial aviation continues to grow in terms of revenue passenger miles and cargo ton miles CO₂ emissions are expected to increase To reduce the contribution of aviation to climate change it is essential to improve the effectiveness of ongoing efforts to reduce emissions and initiate research into new approaches

The End of Doom Ronald Bailey, 2015-07-21 In the past five decades there have been many many forecasts of impending environmental doom They have universally been proven wrong Meanwhile those who have bet on human resourcefulness have almost always been correct In his widely praised book *Ecoclam* Ronald Bailey strongly countered environmentalist alarmism using facts to demonstrate just how wildly overstated many claims of impending ecological doom really were Now twenty years later the Reason Magazine science correspondent is back to assess the future of humanity and

the global biosphere Bailey finds contrary to popular belief that many present ecological trends are quite positive Including Falling cancer incidence rates in the United States The likelihood of a declining world population by mid century The abundant return of agricultural land to nature as the world reaches peak farmland A proven link between increases in national wealth and reductions in air and water pollution Global warming is a problem but the cost of clean energy could soon fall below that of fossil fuels In *The End of Doom* Bailey avoids polemics and offers a balanced fact based and ultimately hopeful perspective on our current environmental situation Now isn t that a breath of fresh air *The Report: Nigeria 2015* Oxford Business Group,2015-05-05 Despite concerns linked to short term and cyclical risks including unequal development policy uncertainty declining oil prices and localised unrest the longer term growth fundamentals are clear Following the presidential elections in March 2015 the newly elected government of President Muhammadu Buhari will face a host of challenges ranging from high levels of rural poverty to concerns over governance and an insurgency in the north The outcome of the presidential elections gave Nigeria its first peaceful handover of power in more than 16 years as well as a boost of momentum that along with its economic fundamentals places it on the cusp of potentially long term broad based growth *Reaping Richer Returns* Aparajita Goyal,John Nash,2017-03-10 Enhancing the productivity of agriculture is vital for Sub Saharan Africa s economic future and is one of the most important tools to end extreme poverty and boost shared prosperity in the region How governments elect to spend public resources has significant development impact in this regard Choosing to catalyze a shift toward more effective efficient and climate resilient public spending in agriculture can accelerate change and unleash growth Not only does agricultural public spending in Sub Saharan Africa lag behind other developing regions but its impact is vitiated by subsidy programs and transfers that tend to benefit elites to the detriment of poor people and the agricultural sector itself Shortcomings in the budgeting processes also reduce spending effectiveness In light of this scenario addressing the quality of public spending and the efficiency of resource use becomes even more important than addressing only the level of spending Improvements in the policy environment better institutions and investments in rural public goods positively affect agricultural productivity These combined with smarter use of public funds have helped lay the foundations for agricultural productivity growth around the world resulting in a wealth of important lessons from which African policy makers and development practitioners can draw *Reaping Richer Returns Public Spending Priorities for African Agriculture Productivity Growth* will be of particular interest to policy makers development practitioners and academics The rigorous analysis presented in this book provides options for reform with a view to boosting the productivity of African agriculture and eventually increasing development impact **The European Handbook of Media Accountability** Tobias Eberwein,Susanne Fengler,Matthias Karmasin,2017-11-08 In recent years the Leveson Inquiry in Great Britain as well as the EU High Level Group on Media Freedom and Pluralism have stirred heated debates about media accountability and media self regulation across Europe How responsible are journalists How well developed are infrastructures of media self

regulation in the different European countries How much commitment to media accountability is there in the media industry and how actively do media users become involved in the process of media criticism via social media With contributions from leading scholars in the field of journalism and mass communication this handbook brings together reports on the status quo of media accountability in all EU members states as well as key countries close to Europe such as Turkey and Israel Each chapter provides an up to date overview of media accountability structures as well as a synopsis of relevant research exploring the role of media accountability instruments in each national setting including both media self regulation such as codes of ethics press councils ombudspersons and new instruments that involve audiences and stakeholder groups such as media blogs and user comment systems A theoretically informed cross national comparative analysis of the state of media accountability in contemporary Europe this handbook constitutes an invaluable basis for further research and policy making and will appeal to students and scholars of media studies and journalism as well as policy makers and practitioners

China's Belt and Road Initiative The International Institute for Strategic Studies (IISS),2022-12-16 The IISS Strategic Dossier China's Belt and Road Initiative provides a geopolitical and geo economic assessment of President Xi Jinping's flagship foreign policy initiative The dossier explores the Belt and Road Initiative's role in China's domestic industrial strategy and in the country's growing influence around the world It studies how Beijing's ambitions management and financing of the initiative have evolved since its launch in 2013 In addition the volume reflects on the future of China's initiative following the COVID 19 pandemic The dossier is organised around a region by region assessment of what Beijing has sought to achieve in different countries and how the Belt and Road Initiative has played out over time The volume examines recipient countries responses to the Belt and Road Initiative and how these have affected it It also looks at responses from other global and regional powers to China's economic activities around the world and offers thoughts on ways the West might better contend with Beijing's geo economic influence

Future Propulsion Systems and Energy Sources in Sustainable Aviation Saeed Farokhi,2020-01-21 A comprehensive review of the science and engineering behind future propulsion systems and energy sources in sustainable aviation Future Propulsion Systems and Energy Sources in Sustainable Aviation is a comprehensive reference that offers a review of the science and engineering principles that underpin the concepts of propulsion systems and energy sources in sustainable air transportation The author a noted expert in the field examines the impact of air transportation on the environment and reviews alternative jet fuels hybrid electric and nuclear propulsion and power He also explores modern propulsion for transonic and supersonic hypersonic aircraft and the impact of propulsion on aircraft design Climate change is the main driver for the new technology development in sustainable air transportation The book contains critical review of gas turbine propulsion and aircraft aerodynamics followed by an insightful presentation of the aviation impact on environment Future fuels and energy sources are introduced in a separate chapter Promising technologies in propulsion and energy sources are identified leading to pathways to sustainable aviation

To facilitate the utility of the subject the book is accompanied by a website that contains illustrations and equation files This important book Contains a comprehensive reference to the science and engineering behind propulsion and power in sustainable air transportation Examines the impact of air transportation on the environment Covers alternative jet fuels and hybrid electric propulsion and power Discusses modern propulsion for transonic supersonic and hypersonic aircraft Examines the impact of propulsion system integration on aircraft design Written for engineers graduate and senior undergraduate students in mechanical and aerospace engineering Future Propulsion Systems and Energy Sources in Sustainable Aviation explores the future of aviation with a guide to sustainable air transportation that includes alternative jet fuels hybrid electric propulsion all electric and nuclear propulsion

The Traffic Systems of Pompeii Eric E. Poehler, 2017-09-12 The Traffic Systems of Pompeii is the first sustained examination of the development of road infrastructure in Pompeii from the archaic age to the eruption of Mt Vesuvius in 79 CE and its implications for urbanism in the Roman empire Eric E Poehler an authority on Pompeii s uniquely preserved urban structure distills over five hundred instances of street level wear and tear to reveal for the first time the rules of the ancient road Through a thorough yet lively investigation of every facet of the infrastructure from the city s urban grid and the shape of the streets to the treatment of their surfaces and the individual elements of construction the intricacies of the Pompeian traffic system and the changes to its operation over time emerge in vivid detail Though archaeological expertise forms the backbone of this book its findings have equally important historical and architectural implications Later chapters probe how the street design and infrastructure affected social roles and hierarchies among property owners in Pompeii illuminating the economic

forces that push and pull upon the shape of urban space The final chapters set the road system into its broader context as one major infrastructural and administrative artifact of the Roman empire s deeply urban culture Where does Pompeii s system fit within the history of Roman traffic control Is it unique for its innovation or only for the preservation that permitted its discovery Poehler marshals evidence from across the Roman world to examine these questions His measured and thoroughly researched answers make *The Traffic Systems of Pompeii* a critical step forward in our understanding of infrastructure in the ancient world
