*Rapid Thermal Processing for Future Semiconductor Devices* H. Fukuda, 2003-04-02 This volume is a collection of papers which were presented at the 2001 International Conference on Rapid Thermal Processing RTP 2001 held at Ise Shima Mie on November 14 16 2001 This symposium is second conference followed the previous successful first International RTP conference held at Hokkaido in 1997 The RTP 2001 covered the latest developments in RTP and other short time processing continuously aiming to point out the future direction in the Silicon ULSI devices and II VI III V compound semiconductor devices This book covers the following areas advanced MOS gate stack integration technologies advanced channel engineering including shallow junction SiGe hetero structure novel metallization inter connect silicidation low k materials thin dielectrics including gate dielectrics and high k materials thin film deposition including SiGe SOI and SiC process and device modelling Laser assisted crystallization and TFT device fabrication technologies temperature monitoring and slip free technologies

*Biometrics* Midori Albert, 2011-04-04 Biometrics Unique and Diverse Applications in Nature Science and Technology provides a unique sampling of the diverse ways in which biometrics is integrated into our lives and our technology From time immemorial we as humans have been intrigued by perplexed by and entertained by observing and analyzing ourselves and the natural world around us Science and technology have evolved to a point where we can empirically record a measure of a biological or behavioral feature and use it for recognizing patterns trends and or discrete phenomena such as individuals and this is what biometrics is all about Understanding some of the ways in which we use biometrics and for what specific purposes is what this book is all about

**FGCS '92**, 1992 *Mathematical and Physical Modeling of Materials Processing Operations* Olusegun Johnso Ilegbusi, Manabu Iguchi, Walter E. Wahnsiedler, 1999-07-29 The past few decades have brought significant advances in the computational methods and in the experimental techniques used to study transport phenomena in materials processing operations However the advances have been made independently and with competition between the two approaches Mathematical models are easier and less costly to implement but experiments are essential for verifying theoretical models In Mathematical and Physical Modeling of Materials Processing Operations the authors bridge the gap between mathematical modelers and experimentalists They combine mathematical and physical modeling principles for materials processing operations simulation and use numerous examples to compare theoretical and experimental results The modeling of transport processes is multi disciplinary involving concepts and principles not all of which can be associated with just one field of study Therefore the authors have taken care to ensure that the text is self sustaining through the variety and breadth of topics covered Beyond the usual topics associated with transport phenomena the authors also include detailed discussion of numerical methods and implementation of process models software and hardware selection and application and representation of auxiliary relationships including turbulence modeling

chemical kinetics magnetohydrodynamics and multi phase flow They also provide several correlations for representing the boundary conditions of fluid flow heat transfer and mass transfer phenomena Mathematical and Physical Modeling of Materials Processing Operations is ideal for introducing these tools to materials engineers and researchers Although the book emphasizes materials some of the topics will prove interesting and useful to researchers in other fields of chemical and mechanical engineering

Social Science Perspectives on Medical Ethics G. Weisz,2012-12-06 Medical or bio ethics has in recent years been a growth industry Journals Centers and Associations devoted to the subject proliferate Medical schools seem increasingly to be filling rare positions in the humanities and social sciences with ethicists Hardly a day passes without some media scrutiny of one or another ethical dilemma resulting from our new found ability to transform the natural conditions of life Although bioethics is a self consciously interdisciplinary field it has not attracted the collaboration of many social scientists In fact social scientists who specialize in the study of medicine have in many cases watched its development with a certain ambivalence No one disputes the significance and often the painfulness of the issues and choices being addressed But there is something about the way these issues are usually handled which seems somehow inappropriate if not wrong headed to one trained in a discipline like sociology or history In their analyses of complex situations ethicists often appear grandly oblivious to the social and cultural context in which these occur and indeed to empirical referents of any sort Nor do they seem very conscious of the cultural specificity of many of the values and procedures they utilize when making ethical judgments The unease felt by many in the social sciences was given articulate expression in a paper by Renee Fox and Judith Swazey which appeared in 1984

**Advances in Energy Science and Equipment Engineering II Volume 2** Shiquan

Zhou, Aragona Patty, Shiming Chen, 2017-09-19 The 2016 2nd International Conference on Energy Equipment Science and Engineering ICEESE 2016 was held on November 12-14, 2016 in Guangzhou, China. ICEESE 2016 brought together innovative academics and industrial experts in the field of energy equipment science and engineering to a common forum. The primary goal of the conference is to promote research and developmental activities in energy equipment science and engineering, and another goal is to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working all around the world. The conference will be held every year to make it an ideal platform for people to share views and experiences in energy equipment science and engineering and related areas. This second volume of the two-volume set of proceedings covers the field of Structural and Materials Sciences and Computer Simulation, Computer and Electrical Engineering. **The Shock and Vibration Digest**, 1981 **Official Gazette of the United States Patent and Trademark Office**, United States Patent and Trademark Office, 1997 **Earthquake-Resistant Structures**, Abbas Moustafa, 2012-02-29 This book deals with earthquake-resistant structures such as buildings, bridges, and liquid storage tanks. It contains twenty chapters covering several interesting research topics written by researchers and experts in the field of earthquake engineering. The book covers seismic resistance design of masonry and reinforced concrete structures to be constructed, as well as safety assessment, strengthening, and rehabilitation of existing structures against earthquake loads. It also includes three chapters on electromagnetic sensing techniques for health assessment of structures post-earthquake, assessment of steel buildings in fire environment, and response of underground pipes to blast loads. The book provides the state of the art on recent progress in earthquake-resistant structures. It should be useful to graduate students, researchers, and practicing structural engineers. **High Performance Computing on Vector Systems 2006**, Thomas Bönisch, Sunil Tiyyagura, Toshiyuki Furui, Yoshiki Seo, Wolfgang Bez, 2007-05-31 The book presents the state of the art in high performance computing and simulation on modern supercomputer architectures. It covers trends in high performance application software development in general and specifically for parallel vector architectures. The contributions cover, among others, the field of computational fluid dynamics, physics, chemistry, and meteorology. Innovative application fields like reactive flow simulations and nano technology are presented. *Computational Science - ICCS 2007*, Yong Shi, Geert Dick van Albada, Jack Dongarra, Peter M.A. Sloot, 2007-07-13 Part of a four-volume set, this book constitutes the refereed proceedings of the 7th International Conference on Computational Science, ICCS 2007, held in Beijing, China, in May 2007. The papers cover a large volume of topics in computational science and related areas, from multiscale physics to wireless networks and from graph theory to tools for program development. *Catalog of Copyright Entries. Third Series*, Library of Congress Copyright Office, 1976 **Correct Software in Web Applications and Web Services**, Bernhard Thalheim, Klaus-Dieter Schewe, Andreas Prinz, Bruno Buchberger, 2015-06-12 The papers in this volume aim at obtaining a common understanding of the challenging research questions in web applications, comprising web information systems, web services, and web

interoperability obtaining a common understanding of verification needs in web applications achieving a common understanding of the available rigorous approaches to system development and the cases in which they have succeeded identifying how rigorous software engineering methods can be exploited to develop suitable web applications and at developing a European scale research agenda combining theory methods and tools that would lead to suitable web applications with the potential to implement systems for computation in the public domain      Sustainability in Fashion and Apparels M. Parthiban,M. R. Srikrishnan,P. Kandhavadvu,2018-02-21 This textbook addresses the pathway to reach sustainability in fashion business and apparel sectors This book contains various research papers originally contributed by different authors from various organizations who are all working towards the eco friendly manufacturing of apparel products This textbook provides approaches techniques alternative procedures sustainable routes to develop sustainable apparel in a more environmentally friendly manner for the future The research papers discussed in this book mainly focus on the various challenges put forth by the apparel industry with respect to environmentally friendly product manufacturing and also provides solutions to achieve the same through different principles and approaches which fulfil the production user and disposal ecological considerations The book will be really useful for academicians industry personnel and to textile and apparel students and scholars who wish to explore their knowledge and innovations in the field of sustainable apparel product manufacturing and processes      The General Radio Experimenter ,1950
