the maximal number of contrasts required In addition every unusual feature or extra degree of contrast is re examined to confirm its validity The resulting feature system is surprisingly simple fewer features are needed than previously proposed and for each feature a two way contrast is sufficient Nevertheless the proposal is reliable in that the notion of contrast is uncontroversial the procedure is explicit and the result is repeatable The book also offers discussion of non contrastive differences between languages sound classes and complex sounds such as affricates consonant glide units consonant liquid units contour tones pre nasalized stops clicks ejectives and implosives **Phonetics For Dummies** William F.
