Gauteng 2014 June Exam Paper 2 Maths Literacy:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

Get Set, Go! Thomas R. Guskey, 2020-03-06 Make school a better experience for students by ensuring grading and reporting practices are honest, accurate, meaningful and fair. A companion to the best selling and award winning *On Your Mark*, this practical guide details how to successfully lead lasting grading reform. Dr Thomas R. Guskey simplifies the transition by guiding educators through six essential steps from developing a coalition devoted to change to creating a systematic plan. Use this resource to develop a new system of grading in your school or district. Become familiar with the process of implementing a rigorous new system of reporting that aligns with the goals of standards based grading. Acquire numerous tools and strategies that will assist in the process of implementing a new grading system. Study the six steps that are essential to any successful attempt to reform grading as well as how to succeed in each. Learn how to form a change action plan that covers the entire system of implementation and improves the student experience.

Knowledge, Curriculum and Equity Brian Barrett, Ursula Hoadley, John Morgan, 2017-07-20 In 2008 the first in a series of symposia established a social realist case for knowledge as an alternative to the relativist tendencies of the constructivist, post structuralist and postmodernist approaches dominant in the sociology of education. The second symposium focused on curriculum and the development of a theoretical language grounded in social realism to talk about issues of knowledge and curriculum. Finally the third symposium brought together researchers in a broad range of contexts to build on these ideas and arguments and with a concerted empirical focus bring these social realist ideas and arguments into conversation with data.

Knowledge Curriculum and Equity: Social Realist Perspectives contains the work of the third symposium where the strengths and gaps in the social realist approach are identified and where there is critical

recognition of the need to incrementally extend the theories through empirical study Fundamentally the problem that social realism is seeking to address is about understanding the social conditions of knowledge production and exchange as well as its structuring in the curriculum and in pedagogy The central concern is with the on going social reproduction of inequality through schooling and exploring whether and how foregrounding specialised knowledge and its access holds the possibility for interrupting it This book consists of 13 chapters by different authors working in Oceania Asia Europe Africa and North America From very different vantage points the authors focus their theoretical and empirical sights on the assumptions about knowledge that underpin educational processes and the pursuit of more equitable schooling for all **Empowering Novice**

Remaindered Life Neferti X. M. Tadiar, 2022-05-02 In *Remaindered Life* Neferti X M Tadiar offers a new conceptual vocabulary and framework for rethinking the dynamics of a global capitalism maintained through permanent imperial war. Tracking how contemporary capitalist accumulation depends on producing life times of disposability Tadiar focuses on what she terms remaindered life practices of living that exceed the distinction between life worth living and life worth expending. Through this heuristic Tadiar reinterprets the global significance and genealogy of the surplus life making practices of migrant domestic and service workers, refugees fleeing wars and environmental disasters, criminalized communities, urban slum dwellers, and dispossessed Indigenous people. She also examines artists and filmmakers in the Global South who render forms of various living in the midst of disposability. Retelling the story of globalization from the side of those who reach beyond dominant protocols of living, Tadiar demonstrates how attending to remaindered life can open up another horizon of possibility for a radical remaking of our present global mode of life.

Handbook of Item Response Theory Wim J. van der Linden, 2018-02-19 Drawing on the work of 75 internationally acclaimed experts in the field, *Handbook of Item Response Theory* Three Volume Set presents all major item response models, classical and modern statistical tools used in item response theory (IRT), and major areas of applications of IRT in educational and psychological testing, medical diagnosis of patient-reported outcomes, and marketing research. It also covers CRAN packages: WinBUGS, BiLOG, MG, Multilog, Parscale, IRTPRO, Mplus, GLLAMM, Latent Gold, and numerous other software tools. A full update of editor Wim J van der Linden and Ronald K Hambleton's classic *Handbook of Modern Item Response Theory*, this handbook has been expanded from 28 chapters to 85 chapters in three volumes. The three volumes are thoroughly edited and cross-referenced with uniform notation, format, and pedagogical principles across all chapters. Each chapter is self-contained and deals with the latest developments in IRT.

Science, Technology, Engineering, Arts, and Mathematics (STEAM) Education in the Early Years Weipeng Yang, Sarika

Kewalramani, Jyoti Senthil, 2023-12-05 This book provides a fresh perspective on recent debates around integrating STEAM (Science, Technology, Engineering, Arts, and Mathematics) education in early childhood. The book offers inspiration and practical advice for educators and researchers. It suggests concrete ways to engage young children in STEAM learning activities and promote their development. With contributions from international experts, the book discusses how to develop age-appropriate

STEAM learning activities for young children Divided into four parts the book covers a wide range of topics including the perceptions and practices of STEAM education among early childhood teachers in different countries the use of new pedagogies and technologies to promote equitable and accessible STEAM education the role of teacher education and policy in reducing inequality in STEAM education and how early STEAM education can promote social change and achieve sustainable development goals The book highlights the importance of STEAM education in providing young children with the necessary skills to create a more sustainable and equitable world Overall this book provides an important contribution to help critique and improve how early childhood educators view and practice STEAM education across cultures It proposes ideas for achieving sustainable development goals through high quality early STEAM education The book appeals to early childhood educators and researchers as it draws on cross cultural viewpoints to critically examine how teachers understand and implement STEAM education across different cultures along with exploring how cultural values and goals shape early STEAM education
