General principles when taking measurements

- Write down the number of DP that is given by your measuring devices. For example, do not write "11 cm", write "11.0" cm when using a ruler.
- Write all subsequent measurements with the same number of DP
- The exception to this is when using a stopwatch – 1 dp at best due to human reaction time
- If you are using a digital meter with a varying value – be sensible.
 - If the meter changes between two values (e.g. 5.39 V and 5.40 V), use the higher.
 - If it changes between three values, choose the middle.
 - Remember, though, that the examiners will not be able to check!

Q1. This is an experiment that should run fairly simply. Begin by setting up the apparatus and taking and recording a measurement.

- a) Taking a measurement of a dependent variable – you will usually be told that it should be set to roughly a specific value.
Marks will not be awarded if your measurement is not very close to this!!
If it tells you "roughly 25.0 cm" – then I guess 25.2 cm is ok. But **just do 25.0 cm** or as close as you can.
- b) Taking a measurement of an independent variable
 - Use an appropriate number of SF/DP – this step will often be a distance, so use the DP available on your measuring device. For time, 1 DP is appropriate
 - Evidence of repeats – take repeat values and find an average. Show your calculations as evidence or not credit will be given
 - If you are finding a time period of an oscillation, you can take multiple (n) oscillations, and divide your total time by n .
- c) Table: general marks criteria
 - 4 marks for taking six readings with a correct trend
 - 1 mark for using a wide enough range (often this range will be given in the question). Usually at least 60% of the total range that you could measure
 - 1 mark for correct column headings **with correct units for all!**
 - 1 mark for being consistent with your DP of your independent variable – for each column use the same number of DP

Rogers,2011-04-17 In our scientific age an understanding of physics is part of a liberal education Lawyers bankers governors business heads administrators all wise educated people need a lasting understanding of physics so that they can enjoy those contacts with science and scientists that are part of our civilization both materially and intellectually They need knowledge and understanding instead of the feelings all too common that physics is dark and mysterious and that physicists are a strange people with incomprehensible interests Such a sense of understanding science and scientists can be gained neither from sermons on the beauty of science nor from the rigorous courses that colleges have offered for generations when the headache clears away it leaves little but a confused sense of mystery Nor is the need met by survey courses that offer a smorgasbord of tidbit they give science a bad name as a compendium of information or formulas The non scientist needs a course of study that enables him to learn real science and make its own with delight For lasting benefits the intelligent non scientist needs a course of study that enables him to learn genuine science carefully and then encourages him to think about it and use it He needs a carefully selected framework of topics not so many that learning becomes superficial and hurried not so few that he misses the connected nature of scientific work and thinking He must see how scientific knowledge is built up by building some scientific knowledge of his own by reading and discussing and if possible by doing experiments himself He must think his own way through some scientific arguments He must form his own opinion with guidance concerning the parts played by experiment and theory and he must be shown how to develop a taste for good theory He must see several varieties of scientific method at work And above all he must think about science for himself and enjoy that These are the things that this book encourages readers to gain by their own study and thinking *Physics for the Inquiring Mind* is a book for the inquiring mind of students in college and for other readers who want to grow in scientific wisdom who want to know what physics really is *Journal of the American Institute of Electrical Engineers* American Institute of Electrical Engineers,1925 Includes preprints of Transactions of the American Institute of Electrical Engineers ISSN 0096 3860 **English Solved Papers** YCT Expert Team , 2023 24 UPTET CTET English Solved Papers **Festschrift In Honor Of The C N Yang Centenary, A: Scientific Papers** Fong-ching Chen,Mo-lin Ge,Bin-lin Gu,Kok Khoo Phua,Kenneth Young,Bang-fen Zhu,2022-08-03 C N Yang is a towering figure of science who has significantly extended human understanding of nature headed one of the foremost research institutes in physics for three decades and made great contributions to the advances of Chinese physics This Festschrift in honor of Professor Yang on his centenary birthday consists of two volumes Volume A

consists of general essays concerning Professor Yang the person as well as the authors impressions and reminiscences of him which are mainly but not exclusively in Chinese This volume that is Volume B consists of over thirty scientific papers in English on subjects broadly related to his work and contributed by two different groups Professor Yang s colleagues friends and former students and graduates from the Tsinghua University Physics Department or Institute for Advanced Study who have come under the influence of Professor Yang and are now established in their own careers review papers presented at a Symposium held in his honor in 2021 are also included It is hoped that this Festschrift can serve as a fit tribute to Professor Yang s lifelong achievements and also increase public awareness of the many different sides of this giant his life his personality his work his influence as well as what he strives for

Selected Papers (1945-1980) Of Chen Ning Yang (With Commentary) Chen Ning Yang, 2005-08-22 A remarkable personal and professional chronicle by one of today s leading physicists this is a collection of Chen Ning Yang s personally selected papers supplemented by his insightful commentaries Including previously unpublished or hard to find works this volume contains Yang s important papers on statistical physics nuclear forces and particle physics Among them are his seminal work with T D Lee on the nonconservation of parity for which they won the Nobel Prize and his work with R L Mills which led to modern gauge theories with their exciting prospects for the broad unification of field theories The commentaries were written especially for this volume and provide a fascinating account of Yang s development as a physicist as well as a look at many important physicists of the 20th century They trace the development of Yang s interests and ideas from his graduate school days to the present showing how he worked with his colleagues and how their physics came into being Together the papers and commentaries in this unique collection comprise a powerful personal statement shedding light on both the intellectual development of a great physicist and on the nature of scientific inquiry

Kruijff, Richard T. Oehrle, 2012-12-06 Geert Jan Kruijff Richard T Oehrle A categorial grammar is both a grammar and a type inference system As a result of this duality the categorial framework offers a natural setting in which to study questions of grammatical composition both empirically and abstractly There are affinities in this perspective of course to basic questions in formal language theory But the fact that categorial grammars are type inference systems makes possible intrinsic connections among syntactic types syntactic type inference semantic types and semantic type inference a connection less apparent in the standard constructions of formal language theory Fixing a system of grammatical type inference T we may explore what

grammatical phenomena are compatible with T and equally what grammatical phenomena are not. Equally, fixing a class of grammatical phenomena \mathcal{g} , we may seek to ascertain what systems of type inference characterize \mathcal{g} . This dual perspective is a strong current in the categorial literature going back to the classical papers of Ajdukiewicz, Bar Hillel, Curry, and Lambek.
