Siadat,2022-10-19 About this Book This book introduces an innovative model in teaching and learning of mathematics It is the result of nearly two decades of research in math education at the college Its main premise is that all students can learn math provided they are engaged in the learning process The award winning Keystone model as is thoroughly described in the book has produced significant student outcomes not only in mathematics but also in English reading comprehension The research has had consistent results during the years of study About the Author M Vali Siadat is a distinguished professor of mathematics at Richard J Daley College He has two doctorates in mathematics a Ph D in pure mathematics and a D A in mathematics education Dr Siadat has more than thirty publications in mathematics and mathematics education and has had numerous presentations at regional national and international mathematics meetings and conferences Professor Siadat is the recipient of several national awards including the 2019 Award for Impact on the Teaching and Learning of Mathematics conferred by the American Mathematical Society the 2009 Mathematical Association of America s Deborah and Franklin Tepper Haimo Award for Distinguished College or University Teaching of Mathematics and the 2005 Carnegie Foundation for the Advancement of Teaching Illinois Professor of the Year Award **Teaching Mathematics at a Technical College**

Zachary Youmans,2022-11-25 Not much has been written about technical colleges especially teaching mathematics at one Much had been written about community college mathematics This book addresses this disparity Mathematics is a beautiful subject worthy to be taught at the technical college level The author sheds light on technical colleges and their importance in the higher education system Technical colleges area more affordable for students and provide many career opportunities These careers are becoming or have become as lucrative as careers requiring a four year degree The interest in technical college education is likely to continue to grow Mathematics like all other classes is a subject that needs time energy and dedication to learn For an instructor it takes many years of hard work and dedication just to be able to teach the subject Students should not be expected to learn the mathematics overnight As instructors we need to be open honest and put forth our very best to our students so that they can see that they are able to succeed in whatever is placed in front of them This book hopes to encourage such an effort A notable percentage of students who are receiving associate degrees will go through at least one of more mathematics courses These students should not be forgotten about their needs are similar to any student who is required to take a mathematics course to earn a degree This book offers insight into teaching mathematics at a technical college It is also a source for students to turn toward when they are feeling dread in taking a mathematics course

Mathematics instructors want to help students succeed If they put forth their best effort and us ours we can all work as one team to get the student through the course and onto chasing their dreams Though this book focuses on teaching mathematics some chapters expand to focus on teaching in general The overall hope is the reader will be inspired by the great work that is happening at technical colleges all around the country Technical college can be should be and is the backbone of the American working class
