Federal Probation ,1962 Max Weber and the Idea of Economic Sociology Richard Swedberg,2018-06-05 While most people are familiar with The Protestant Ethic and the Spirit of Capitalism few know that during the last decade of his life Max Weber 1864 1920 also tried to develop a new way of analyzing economic phenomena which he termed economic sociology Indeed this effort occupies the central place in Weber s thought during the years just before his death Richard Swedberg here offers a critical presentation and the first major study of this fascinating part of Weber s work This book shows how Weber laid a solid theoretical foundation for economic sociology and developed a series of new and highly evocative concepts He not only investigated economic phenomena but also linked them clearly with political legal and religious phenomena Swedberg also demonstrates that Weber s approach to economic sociology addresses a major problem that has haunted economic analysis since the nineteenth century how to effectively unite an interest driven type of analysis popular with economists with a social one of course preferred by sociologists Exploring Weber s views of the economy and how he viewed its relationship to politics law and religion Swedberg furthermore discusses similarities and differences between Weber s economic sociology and present day thinking on the same topic In addition the author shows how economic sociology has recently gained greater credibility as economists and sociologists have begun to collaborate in studying problems of organizations political structures social problems and economic culture more generally Swedberg s book will be sure to further this new cooperation **Methodology of Sociological Research** S. Nowak,2012-12-06 This is the first part of a textbook for students of sociology and for those students of other social sciences who wish to make use in their work of the research methods elaborated in the course of the develop ment of empirical sociology over the last few decades The development of empirical sociological research in our country and the growing demand both for a practical application of its results and for graduates of sociological studies in various fields of social practice testifies to a much broader trend It is evidence of a desire to base our understanding and conscious transformation of social phenom ena on a sound scientific perception of social processes and the mechanisms governing them The increasing volume of studies in Poland is accompanied by a growing need for a particular type of re search method namely one in which questions addressed to the socio logist would be answered in a manner as free as possible of conclusions based on impressions and defining as unambiguously as possible both the limits of the generality and the degree of validity of the inferences drawn from the results of the research These conditions are met by the so called standardized methods of investigating social phenomena which together with statistical methods of analyzing collected material consti tute the principal means of conducting sociological research in the world today *The London Review and Weekly Journal of Politics, Literature, Art, & Society*
