Details

Define heredity.

Heredity: the passing of traits from parents to offspring

Describe genetics, and explain why Gregor Mendel is known as the father of genetics.

Genetics is the study of how traits are passed from parents to offspring. Gregor Mendel is known as the father of genetics because 150 years ago, he performed experiments that helped to explain how traits are passed from parent to offspring.

Identify three reasons why Mendel chose pea plants for his genetic studies.

1. They reproduce quickly.
2. They have easily observed traits.
3. Reproduction could be controlled.

Sequence the 2 ways pea plants pollinate.

sperm (pollen) + eggs = self-pollination

from the same plant

sperm (pollen) + eggs = cross-pollination

from different plants

Detail the 2 ways in which cross-pollination can occur.
