

The background of the entire cover is a complex, repeating geometric pattern. It consists of interlocking shapes that create a three-dimensional, crystalline effect. The pattern is rendered in shades of gray and white, with some areas appearing more prominent than others, giving it a textured, almost architectural feel. In the top left corner, there is a smaller, darker version of this pattern, which serves as a backdrop for the title text.

Glocal Pharma Ericka Johnson, Ebba Sjögren, Cecilia Åsberg, 2016-05-12 The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license An exploration of how global pharmaceutical products are localized of what happens when they become glocal this book examines the tensions that exist between a global pharmaceutical market and the locally bounded discourses and regulations encountered as markets are created for new drugs in particular contexts Employing the case study of the emergence

representation and regulation of Viagra in the Swedish market Glocal Pharma offers analyses of commercial material medical discourses and legal documents to show how a Swedish Viagra consuming subject has been constructed in relation to the drug and how Viagra is imagined in relation to the Swedish man Engaging with debates about pharmaceuticalization the authors consider the ways in which new identities are created around drugs the redefinition of health problems as sites of pharmaceutical treatment and changes in practices of governance to reflect the entrance of pharmaceuticals to the market With attention to local contexts it reveals elements in the nexus of pharmaceuticalization that are receptive to cultural elements as new products become embedded in local markets An empirically informed study of the the ways in which the presence of a drug can alter the concept of a disease and its treatment understandings of who suffers from it and how to cure it both locally and internationally this book will appeal to scholars of sociology and science and technology studies with interests in globalization pharmaceuticals gender and the sociology of medicine The Global Social Sciences Michael Vessuri, Hebe Kuhn, 2016-09-13 The European social sciences tend to absorb criticism that has been passed on the European approach and re label it as a part of what the critique opposes criticism of European social sciences by subaltern social sciences their talking back has become a frequent line of reflection in European social sciences The re labelling of the critique of the European approach to social sciences towards a critique from Southern social sciences of Western social sciences has somehow turned Southern as well as Western social sciences into competing contributors to the same globalizing social sciences Both are no longer arguing about the European approach to social sciences but about which social thought from which part of the globe prevails If the critique becomes a part of what it opposes one might conclude that the European social sciences are very adaptable and capable of learning One might however also raise the question whether there is anything wrong with the criticism of the European social sciences or for that matter whether there is anything wrong with the European social sciences themselves The contributions in this book discuss these questions from different angles They revisit the mainstream critique of the European social sciences and they suggest new arguments criticizing social science theories that may be found as often in the Western as in the Southern discourse Knowledge Production, Area Studies and Global Cooperation Claudia Derichs, 2017-04-27 Whereas Area Studies and cross border cooperation research conventionally demarcates groups of people by geographical boundaries individuals might in fact feel more connected by shared values and principles than by conventional spatial dimensions Knowledge Production Area Studies and Global Cooperation asks what norms and principles lead to the creation of knowledge about cross border cooperation and connection It studies why theories methods and concepts originate in one place rather than another how they travel and what position the scholar adopts while doing research particularly in the field Taking case studies from Asia the Middle East and North Africa the book links the production of alternative epistemologies to the notion of global cooperation and reassesses the ways in which the concept of connectedness can be applied at the translocal and individual rather than the formal

international and collective level Knowledge Production Area Studies and Global Cooperation provides an innovative and critical approach towards established means of producing knowledge about different areas of the world demonstrating that an understanding of pluri local connectivity should be integrated into the production of knowledge about different areas of the world and the behavioural dimension of global cooperation By shifting the view from the collective to the individual and from the formal to often invisible patterns of connectedness this book provides an important fresh perspective which will be of interest to scholars and students of Area Studies Politics International Relations and Development Studies The Global Turn Eve Darian-Smith, Philip C. McCarty, 2017-05-23 Deploying interdisciplinary theoretical perspectives that speak to interconnected global dimensions is critical if one's work is to remain relevant and applicable to the emerging global scale issues of our time The Global Turn is a guide for students and scholars across all areas of the social sciences and humanities who wish to embark upon global studies research projects The authors demonstrate how the global can be studied from a local perspective and vice versa Global processes manifest at multiple transnational regional national and local levels interconnected dimensions that are mutually constitutive This book walks the reader through the steps of thinking like a global scholar in theoretical methodological and practical terms explaining the implications of global perspectives for research design *Southeast European Studies in a Globalizing World* Christian Promitzer, Siegfried Gruber, Harald Heppner, 2014 Since the early 1990s Southeast European studies have undergone profound changes being shaped by the wars of Yugoslav succession and the ramifications of post socialism coupled with democratic deficiencies which characterize most of Southeast Europe The countries which it encompasses rest uneasily on the periphery of the developed variant of Western capitalism but they have nonetheless to contend with the challenges of adjusting to a market economy The imprint of these contexts on academic research has led to a discussion of the role of Southeast European studies It is the task of this volume to summarize and raise awareness of this discussion Series Studies on South East Europe Vol 16 Subject European Studies Sociology Politics Making Global Knowledge in Local Contexts Katarzyna Kaczmarska, 2020-04-08 This book draws on extensive ethnographic research undertaken in Russia to show how the wider sociopolitical context the political system relationship between the state and academia as well as the contours of the public debate shapes knowledge about international politics and influences scholars engagement with the policy world Combining an in depth study of the International Relations discipline in Russia with a robust methodological framework the book demonstrates that context not only bears on epistemic and disciplinary practices but also conditions scholars engagement with the wider public and policymakers This original study lends robust sociological foundations to the debate about knowledge in International Relations and the social sciences more broadly In particular the book questions contemporary thinking about the relationship between knowledge and politics by situating the university within rather than abstracting it from the political setting The monograph benefits from a comprehensive engagement with Russian language literature in the Sociology of Knowledge and

critical reading of International Relations scholarship published in Russia This text will be of interest to scholars and students in International Relations Russian and Post Soviet Studies the Sociology of Knowledge Science and Technology Studies and Higher Education Studies It will appeal to those researching the knowledge policy nexus and knowledge production practices
