*The Sea, Volume*

12: *Biological-Physical Interactions in the Sea* James J. McCarthy, Allan R. Robinson, Brian J. Rothschild, 2005 *Academy of Management Perspectives*, 2009 *Ocean Biogeochemical Dynamics* Jorge L. Sarmiento, 2013-07-17 *Ocean Biogeochemical Dynamics* provides a broad theoretical framework upon which graduate students and upper level undergraduates can formulate an understanding of the processes that control the mean concentration and distribution of biologically utilized elements and compounds in the ocean. Though it is written as a textbook, it will also be of interest to more advanced scientists as a wide ranging synthesis of our present understanding of ocean biogeochemical processes. The first two chapters of the book provide an introductory overview of biogeochemical and physical oceanography. The next four chapters concentrate on processes at the air-sea interface: the production of organic matter in the upper ocean, the remineralization of organic matter in the water column, and the processing of organic matter in the sediments. The focus of these chapters is on analyzing the cycles of organic carbon, oxygen, and nutrients. The next three chapters round out the authors' coverage of ocean biogeochemical cycles with discussions of silica, dissolved inorganic carbon, and alkalinity, and  $\text{CaCO}_3$ . The final chapter discusses applications of ocean biogeochemistry to our understanding of the role of the ocean carbon cycle in interannual to decadal variability, paleoclimatology, and the anthropogenic carbon budget. The problem sets included at the end of each chapter encourage students to ask critical questions in this exciting new field. While much of the approach is mathematical, the math is at a level that should be accessible to students with a year or two of college-level mathematics and/or physics.

**Underglobalization** Joshua Neves, 2020-03-06. Despite China's recent emergence as a major global economic and geopolitical power, its association with counterfeit goods and intellectual property piracy has led many in the West to dismiss its urbanization and globalization as suspect or inauthentic. In *Underglobalization*, Joshua Neves examines the cultural politics of the fake and how frictions between legality and legitimacy propel dominant models of economic development and political life in contemporary China. Focusing on a wide range of media technologies and practices in Beijing, Neves shows how piracy and fakes are manifestations of what he calls underglobalization: the ways social actors undermine and refuse to implement the specific procedures and protocols required by globalization at different scales. By tracking the rise of fake politics and transformations in political society in China and globally, Neves demonstrates that they are alternate outcomes of globalizing processes rather than anathema to them.

**International Business in the 21st Century** Bruce D. Keillor, Vijay R. Kannan, 2011-05-04. writers Coal and Coalbed Gas Romeo M. Flores, 2013-10-19 Bridging the gap in expertise between coal and coalbed gas subfields in which opportunities for cross training have been nonexistent Coal and Coalbed Gas sets the standard for publishing in these areas This book treats coal and coalbed gas as mutually inclusive commodities in terms of their interrelated origin accumulation composition distribution generation and development providing a balanced understanding of this energy mix Currently considered a non renewable energy resource coalbed gas or coalbed methane is a form of natural gas extracted from coal beds In recent years countries have begun to seek and exploit coal for its clean gas energy in an effort to alleviate environmental issues that come with coal use making a book on this topic particularly timely This volume takes into account processes of coalification gasification and storage and reservoir characterization and evaluation and looks at water management and environmental impacts as well Covers environmental issues in the development of coalbed gas Includes case studies field guides and data examples and analytical procedures from previous studies and investigations Accessible by a large multidisciplinary market by one of the world's foremost experts on the topic

**The Return of Bipolarity in World Politics** Øystein Tunsjø, 2018-02-27 Since the collapse of the Soviet Union the international system has been unipolar centered on the United States But the rise of China foreshadows a change in the distribution of power ystein Tunsj shows that the international system is moving toward a U S China standoff bringing us back to bipolarity a system in which no third power can challenge the top two The Return of Bipolarity in World Politics surveys the new era of superpowers to argue that the combined effects of the narrowing power gap between China and the United States and the widening power gap between China and any third ranking power portend a new bipolar system that will differ in crucial ways from that of the last century Tunsj expands Kenneth N Waltz's structural realist theory to examine the new bipolarity within the context of geopolitics which he calls geostructural realism He considers how a new bipolar system will affect balancing and stability in U S China relations predicting that the new bipolarity will not be as prone to arms races as the previous era's that the risk of limited war between the two superpowers is likely to be higher in the coming bipolarity especially since the two powers are primarily rivals at sea rather than on land and that the superpowers are likely to be preoccupied with rivalry and conflict in East Asia instead of globally Tunsj presents a major challenge to how international relations understands superpowers in the twenty first century
