Children and Youth on the Front Line Jo Boyden, Joanna de Berry, 2005-03-01 War leads not just to widespread death but also to extensive displacement overwhelming fear and economic devastation It weakens social ties threatens household survival and undermines the family's capacity to care for its most vulnerable members Every year it kills and maims countless numbers of young people undermines thousands of others psychologically and deprives many of the economic educational health and social opportunities which most of us consider essential for children's effective growth and well being Based on detailed ethnographic description and on young people's own accounts this volume provides insights into children's experiences as both survivors and perpetrators of violence It focuses on girls who have been exposed to sexual exploitation and abuse children who head households or are separated from their families displaced children and young former combatants who are attempting to adjust to their changed circumstances following the cessation of conflict In this sense the volume bears witness to the grim effects of warfare and displacement on the young Nevertheless despite the abundant evidence of suffering it maintains that children are not the passive victims of conflict but engage actively with the conditions of war an outlook that challenges orthodox research perspectives that rely heavily on medicalized notions of victim and trauma **International Perspectives on Child and Adolescent Mental Health** Nirbhay N Singh, Thomas H

Ollendick, Ashvini N Singh, 2002-04-17 The papers included in this volume highlight research and practice in child and adolescent mental health from around the world As systems of care are different across countries and cultures it is imperative that knowledge is shared and lessons learned The biennial Elsevier conference on Child and Adolescent Mental Health is designed to provide a forum for mental health and educational experts from various disciplines and countries

Protecting Childhood in the AIDS Pandemic Jody Heymann, Lorraine Sherr, Rachel Kidman, 2012-02-20 Protecting Childhood in the AIDS Pandemic provides lessons from experts around the world on how to transform the outcomes of children affected by HIV/AIDS It examines which public policies and programs best meet the full range of children's needs

from medical care to social support and from infancy to adolescence *Democratizing Health* the late Hans Löfgren, Evelyne de Leeuw, Michael Leahy, 2011-01-01 This book examines the important role of consumer activism in health policy in different national contexts In an age of shifting boundaries between state and civil society consumer groups are potentially drivers of democratisation in the health domain The expert contributors explore how their activities bring new dynamics to relations between service providers the medical profession government agencies and other policy actors This book is unique in comprehensively analysing the opportunities and dilemmas of this type of activism including ambiguous partnerships between consumer groups and stakeholders such as the pharmaceutical industry These themes are explored within an internationally comparative framework with case studies from various countries **Reimagining Child Soldiers in International Law and Policy** Mark A. Drumbl, 2012-01-26 The international community's efforts to halt child soldiering have yielded some successes But this pernicious practice persists It may shift locally but it endures globally Preventative measures therefore remain inadequate Former child soldiers experience challenges readjusting to civilian life Reintegration is complex and eventful The homecoming is only the beginning Reconciliation within communities afflicted by violence committed by and against child soldiers is incomplete Shortfalls linger on the restorative front The international community strives to eradicate the scourge of child soldiering Mostly though these efforts replay the same narratives and circulate the same assumptions Current humanitarian discourse sees child soldiers as passive victims tools of war vulnerable psychologically devastated and not responsible for their violent acts This perception has come to suffuse international law and policy Although reflecting much of the lives of child soldiers this portrayal also omits critical aspects This book pursues an alternate path by reimagining the child soldier It approaches child soldiers with a more nuanced and less judgmental mind This book takes a second look at these efforts It aspires to refresh law and policy so as to improve preventative restorative and remedial initiatives while also vivifying the dignity of youth Along the way Drumbl questions central tenets of contemporary humanitarianism and rethinks elements of international criminal justice This ground breaking book is essential reading for anyone committed to truly emboldening the rights of the child It offers a way to think about child soldiers that would invigorate international law policy and best practices Where does this reimagination lead Not toward retributive criminal trials but instead toward restorative forms of justice Toward forgiveness instead of excuse thereby facilitating reintegration and promoting social repair within afflicted communities Toward a better understanding of child soldiering without which the practice cannot be ended This book also offers fresh thinking on related issues ranging from juvenile justice to humanitarian interventions to the universality of human rights to the role of law in responding to mass atrocity Global HIV/AIDS Politics, Policy, and Activism Raymond A. Smith, 2013-10-28 An international team of specialists in politics policy and activism provide an indispensable guide to the persistent challenges and emerging issues posed by the global HIV AIDS epidemic now in its fourth decade The HIV AIDS epidemic is at a critical turning point Compelling new findings herald the potential to

eventually grind the epidemic to a halt through a combination of expanded treatment coverage and new biomedical approaches to prevention At the same time the severe global economic downturns have negatively affected wealthy donor nations that have provided the funds and technical support for programs in the developing world It is against this backdrop that this landmark three volume set was developed It provides a broad overview of the critical political issues surrounding HIV AIDS inspects key areas of policy and policymaking and spotlights the most important forms of activism and community mobilization The volumes reflect an eclectic and wide ranging set of issues written by an international team comprising dozens of authors from nations including the United States the United Kingdom Ghana South Africa Brazil Cambodia Norway and Qatar The international contributors represent a variety of disciplines and bring with them a range of styles and methodological approaches appropriate to their specific topics and disciplines An important addition to academic and public libraries this expansive work will benefit students and other readers interested in politics policymaking public health activism and community mobilization both in the United States and globally

America's New Vaccine Wars Mark C. Navin,Katie Attwell,2023 This book traces the history politics and ethics of mandatory childhood vaccination policy in America with close attention to recent legislative changes in California California was the first US state to ban unvaccinated children from school in response to parents refusing vaccines The new policy kick started immunization

rates but also ignited polarizing debates about whether government should restrict people's liberty to promote public health. Other US states and other countries are watching California carefully should they follow in its footsteps. Using original interviews with politicians, activists, technical experts, and civil society organization representatives, Mark C. Navin and Katie Attwell unpack the causes and consequences of cracking down on vaccine refusal in contemporary America.
