Economic geographers have always argued that space is key to understanding the economy that the processes of economic growth and development do not occur uniformly across geographic space but rather differ in degree and form as between different nations regions cities and localities with major implications for the geographies of wealth and welfare This was true in the industrial phase of global capitalism and is no less true in the contemporary era of post industrial knowledge driven global capitalism Indeed the marked changes occurring in the structure and operation of the economy in the sources of wealth creation in the organisation of the firm in the nature of work in the boundaries between market and state and in the regulation of the socio economy have stimulated an unprecedented wave of theoretical conceptual and empirical enquiry by economic geographers Even economists who traditionally have viewed the economy in non spatial terms as existing on the head of the proverbial pin are increasingly recognising the importance of space place and location to understanding economic growth technological innovation competitiveness and globalisation This collection of previously published work though containing but a fraction of the huge explosion in research and publication that has occurred over the past two decades seeks to convey a sense of this exciting phase in the intellectual development of the discipline and its importance in grasping the spatialities of contemporary economic life **Leading Pharmaceutical Innovation** Oliver

Stiftung, 2010-07-30 Innovation over the last years has become one of the most used terms in corporate practice and management theory. Companies hardly have an alternative to constantly fostering innovation if they want to survive in the long run. In order to achieve constant willingness and capacity for innovations taking along employees on this path establishing transparency about the necessity of innovation and creating the framework conditions for creative motivated performance with the help of corporate culture are necessary preconditions. Granting entrepreneurial freedom within as decentral structures as possible delegating responsibility in combination with profit sharing and leading a partnership based dialogue among all stakeholders transports identification with the company and the tasks. This again encourages the willingness to perform and change among employees as well as the competitiveness of the company. Three case studies of internationally successful corporations prove this context and give impulses to shape an innovation friendly corporate culture.

Wegbereiter der Globalisierung Christian Marx, 2023-05-15 Die Studie handelt von der Multinationalisierung europäischer Unternehmen im letzten Drittel des 20. Jahrhunderts. Am Beispiel von vier großen Chemiekonzernen Bayer, Hoechst, Rhône-Poulenc, Akzo fragt sie in europäisch vergleichender Perspektive nach der Bedeutung von multinationalen Unternehmen für die jüngsten Globalisierungsprozesse und die zunehmende Interdependenz in der Weltwirtschaft. Sie zeigt sie auf, dass sich die unternehmensstrategischen Leitlinien wie auch die politischen und ökonomischen Ordnungsstrukturen ab den 1970er Jahren grundlegend veränderten und reflektiert die Herausforderungen dieses Strukturwandels.
