An expert guide to developing and delivering technical product training programs. While there are many books on talent development, leadership training, and internal training program development, there are precious few offering subject matter experts (SMEs) guidance on training others to get the most out of their products. Written by a training expert with many years of experience working at top technology companies, *Product Training for the Technical Expert* fills that yawning gap in the training literature by providing technical experts with a comprehensive handbook on becoming effective product training instructors. When new technology is rapidly transformed into products for popular consumption, technical experts such as engineers and other subject matter experts are the ones tasked with instructing the public on their use. Unfortunately, most of them have little or no prior experience or training in adult education and don't have a clue about how to transfer their knowledge to others. In this book, author Daniel W. Bixby draws upon his vast experience developing and delivering training programs at Honeywell, Delphax, Telex, Bosch, and TE Connectivity among other technology companies to arm SMEs with the knowledge and skills they need to add Product Training Specialist to their resumes. Addresses an area of training too often overlooked and ignored in the professional literature. Equips SMEs with the tools they need to become effective product instructors. Covers both the educational and business aspects of product training for SMEs.
