Davidson,2017-09-05 A leading educational thinker argues that the American university is stuck in the past and shows how we can revolutionize it for our era of constant change Our current system of higher education dates to the period from 1865 to 1925 It was in those decades that the nation s new universities created grades and departments majors and minors all in an attempt to prepare young people for a world transformed by the telegraph and the Model T As Cathy N Davidson argues in *The New Education* this approach to education is wholly unsuited to the era of the gig economy From the Ivy League to community colleges she introduces us to innovators who are remaking college for our own time by emphasizing student centered learning that values creativity in the face of change above all *The New Education* ultimately shows how we can teach students not only to survive but to thrive amid the challenges to come University Trends Jonathan Coulson,Paul Roberts,Isabelle Taylor,2014-09-15 A university campus is a place with special resonance conjuring images of cloistered quadrangles and wood panelled libraries often echoing centuries of scholarly tradition And yet it is also a place of cutting edge science interactive learning youth vibrancy and energy It is this dual nature which makes the physical environment of a university so dynamic as well as a highly challenging landscape to design and manage successfully Today the scale of the pressures and the rate of change facing higher education institutions are greater than ever Squeezed public spending rising tuition fees and the growing education ambitions of developing nations are set against a backdrop of rapid technological progress and changing pedagogies What are the repercussions for the physical realities of university planning and architecture And how are university campuses adapting to contend with these pressures *University Trends* introduces the most significant widespread and thought provoking trends in campus design today Part 1 identifies current trends such as starchitecture large scale campus extensions adaptive re use and international branch campuses Part 2 profiles each trend via highly illustrated global case studies of well publicised as well as lesser known projects The essential guide to current and future trends in campus design **Smart University** Lindsay Weinberg,2024-10-08 How surveillance perpetuates long standing injustices woven into the fabric of higher education Higher education increasingly relies on digital surveillance in

the United States Administrators consulting firms and education technology vendors are celebrating digital tools as a means of ushering in the age of smart universities By digitally monitoring and managing campus life institutions can supposedly run their services more efficiently strengthen the quality of higher education and better prepare students for future roles in the digital economy Yet in practice these initiatives often perpetuate austerity structural racism and privatization at public universities under the guise of solving higher education s most intractable problems In Smart University Lindsay Weinberg evaluates how this latest era of tech solutions and systems in our schools impacts students abilities to access opportunities and exercise autonomy on their campuses Using historical and textual analysis of administrative discourses university policies conference proceedings grant solicitations news reports tech industry marketing materials and product demonstrations Weinberg argues that these more recent transformations are best understood as part of a longer history of universities supporting the development of technologies that reproduce racial and economic injustice on their campuses and in their communities Aimed at anyone concerned with the future of surveillance on higher education Smart University empowers readers with the knowledge tools and frameworks for contesting and reimagining the role of digital technology on university campuses

states with nuclear or WMD ambitions or capabilities As a NATO member Turkey also hosts U S nuclear bombs on its territory although some question the durability of this relationship This dynamic has naturally led to speculation that Turkish leaders might someday consider moving beyond a civilian course to develop nuclear weapons Yet there has been remarkably little informed analysis and debate on Turkey s nuclear future either within the country or in broader international society This volume explores the current status and trajectory of Turkey s nuclear program adding historical perspective analytical rigor and strategic insight

Media Independence James Bennett,Niki Strange,2014-11-20 Media independence is central to the organization make up working practices and output of media systems across the globe Often stemming from western notions of individual and political freedoms independence has informed the development of media across a range of platforms from the freedom of the press as the fourth estate and the rise of Hollywood s Independent studios and Independent television in Britain through to the importance of Indy labels in music and gaming and the increasing importance of independence of voice in citizen journalism Media independence for many therefore has come to mean working with freedom from state control or interference from monopoly from market forces as well as freedom to report comment create and document without fear of persecution However far from a stable concept that informs all media systems the notion of media independence has long been contested forming a crucial tension point in the regulation shape size and role of the media around the globe Contributors including David Hesmondhalgh Gholam Khiabany Jos van Dijck Hector Postigo Anthony Fung Stuart Allan and Geoff King demonstrate how the notion of independence has remained paramount but contested in ideals of what the media is for how it should be regulated what it should produce and what working within it should be like They address questions of economics labor relations production cultures ideologies and social functions
