## **Grade 11 Life Science Memo September 2014:**

**Debating Modern Medical Technologies** Karen J. Maschke, Michael K. Gusmano, 2018-09-14 This book analyzes policy fights about what counts as good evidence of safety and effectiveness when it comes to new health care technologies in the United States and what political decisions mean for patients and doctors. Medical technologies often promise to extend and improve quality of life but come with many questions. Are they safe and effective? Are they worth the cost? When should they be allowed on the market and when should Medicare, Medicaid and private insurance companies be required to pay for drugs, devices and diagnostic tests? Using case studies of disputes about the value of mammography screening, genetic testing for disease risk, brain imaging technologies to detect biomarkers associated with Alzheimer's disease, cell based therapies and new expensive drugs, Maschke and Gusmano illustrate how scientific disagreements about what counts as good evidence of safety and effectiveness are often swept up in partisan fights over health care reform and battles among insurance and health care companies, physicians and patient advocates. *Debating Modern Medical Technologies: The Politics of Safety, Effectiveness and Patient Access* reveals stakeholders differing values and interests regarding patient choice, physician autonomy, risk assessment, government intervention in medicine and technology assessment and scientific innovation as a driver of national and global economies. It will help readers to understand the nature and complexity of past and current policy disagreements and their effects on patients.

**Teach** Janice Koch, 2019-01-02 Teach is a concise introduction to education that challenges students' preconceived notions of teaching in order to transform them into reflective practitioners. Empathizing with the difficulties students face as they move from the college classroom to their own classrooms, revered author Janice Koch invites readers to both reflect on their own dispositions for teaching and look outside of themselves to the demands of the profession, making the philosophy of teaching and learning accessible and relevant. The Fourth Edition emphasizes the changing student population and the role of technology and globalization in the field while also including the Interstate Teacher Assessment and Support Consortium (InTASC) standards correlating with each chapter's content. With the guidance of this supportive text, students will gain vital exposure by engaging with professional standards from the very start of their career.

**Breaking Point** Rebecca Schwartz Greene, 2023-01-03 WINNER SOCIETY FOR MILITARY HISTORY DISTINGUISHED BOOK AWARDS FIRST BOOK This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II. *Breaking Point* is the first in-depth history of American psychiatry in World War II. Drawn from unpublished primary documents, oral histories and the author's personal interviews and correspondence over years with key psychiatric and military policymakers, it begins with Franklin Roosevelt's endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre and post induction examinations. Ultimately, 2.5 million men and women were rejected or discharged from military service on neuropsychiatric grounds. Never before or since has the United States engaged in such a program. In designing Selective Service Medical Circular No. 1, psychiatrist Harry Stack Sullivan assumed

psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter While many American and European psychiatrists questioned this belief and huge numbers of American psychiatric casualties soon raised questions about screening s validity psychiatric and military leaders persisted in 1942 and 1943 in endorsing ever tougher screening and little else Soon families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs and Blacks and Native Americans among others complained of bias A frustrated General George S Patton famously slapped two malingering neuropsychiatric patients in Sicily a sentiment shared by Marshall and Eisenhower though they favored a tamer style Yet psychiatric rejections evacuations and discharges mounted While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943 this was the exception But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself not predisposition precipitated breakdown leading military psychiatrists switched their emphasis from screening to prevention and treatment But this switch was too little too late and slowed by a year long series of Inspector General investigations even while numbers of psychiatric casualties soared Ironically despite and even partly because of psychiatrists wartime performance plus the emotional toll of war postwar America soon witnessed a dramatic growth in numbers popularity and influence of the profession culminating in the National Mental Health Act 1946 But veterans with PTSD not recognized until 1980 were largely neglected

### **Failing**

**Our Future** Joshua R. Eyler,2024-08-27 An indictment of the grading system in American schools and colleges and a blueprint for how we can change it One of the most urgent and long standing issues in the US education system is its obsession with grades In Failing Our Future Joshua R Eyler shines a spotlight on how grades inhibit learning cause problems between parents and children amplify inequities and contribute to the youth mental health crisis Eyler who runs the Center for Excellence in Teaching and Learning at the University of Mississippi illustrates how grades interfere with students intrinsic motivation and perpetuate the idea that school is a place for competition rather than discovery Grades force students to focus on rewards and distract them from exploring ideas or pursuing interests beyond what they ll be tested on In fact grades significantly impede the learning process They are also significantly affecting children s physical emotional and psychological well being Rates of anxiety depression and suicidal ideation have spiked and academic stress tied to grades is a leading cause of this escalation Eyler shares success stories of grading reform efforts that are already under way as an antidote to the harms caused by the practices currently used in educational institutions Equal parts scathing and hopeful Failing Our Future aims to improve the lives of students by encouraging them to define success on their own terms Parents educators policymakers and students will find in these pages a rallying cry for change and a blueprint for how to implement reforms in our homes and classrooms
