The over-harvesting of traditional indigenous medicinal plants contributes to the decline of biodiversity in South Africa.

The African potato (*Hypoxis hemerocallidea*) is a natural resource that is widely used as a traditional medicine in South Africa. The use of the plant escalated at the onset of the HIV/AIDS pandemic because it was popularly believed that it cures AIDS. Extensive medical research has shown that it is not a cure for AIDS, although it may have other medicinal properties.

Field research, on the rate at which it is harvested, was done in YaaTula Natal. The results show that more than 40 000 corms are widely harvested every year.

- 3.4.1 Suggest TWO ways in which the African potato can be used sustainably to prevent extinction. (2)
- 3.4.2 Give THREE reasons why biodiversity is important to humans. (3)

QUESTION 4

"Do more than 94% of South Africans really have access to clean, safe drinking water?" Water and Environment minister Elinor Khosha says that "The reality is that everyone in South Africa has access to water because they are alive. Without water you die. The real question is, do they have access to water that is going to be good for their health and that is a more difficult question to answer".

Write an essay in which you explain how agriculture contribute to the decrease in the quality of water.

Mind Mapping and Artificial Intelligence Jose Maria Guerrero, 2022-10-22 In the near future we will see an increase in the development and use of all sorts of AI applications Some of the more promising areas will be Finance Healthcare IoT Manufacturing Journalism and Cybersecurity Many of these applications generate a great amount of complex information Natural Language Understanding is one of the most clear examples Traditional ways of visualizing complex information namely linear text web pages and

hyperlink based applications have serious productivity problems Users need a lot of time to visualize the information and have problems seeing the whole picture of the results Mind mapping is probably the only way of reducing the problems inherent in these traditional ways of visualizing complex information Most people have no clear idea about the advantages of mind mapping or the problems created by the traditional ways of visualizing complex information The goal of Mind Mapping and Artificial Intelligence is to provide readers with an introduction to mind mapping and artificial intelligence to the problems of using traditional ways of visualizing complex information and as an introduction to mind mapping automation and its integration into Artificial Intelligence applications such as NLU and others As more applications of Artificial Intelligence are developed in the near future the need for the improvement of the visualization of the information generated will increase exponentially Information overload will soon also happen in AI applications This will diminish the advantages of using AI Author Jos Maria Guerrero is a long time expert in mind mapping and visualization techniques In this book he also introduces readers to MindManager mind mapping software which can considerably reduce the problems associated with the interpretation of complex information generated by Artificial Intelligence software Provides coverage of the fundamentals of mind mapping and visualization applied to Artificial Intelligence applications Includes coverage of the scientific bases for mind mapping for the visualization of complex information Introduces MindManager software for mind mapping Introduces the author's MindManager toolkit for the readers to use in development of new mind mapping applications Includes case studies and real world applications of MindManager for AI applications including examples using IBM Watson NLU

The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace's reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation

magnet education and the changing nature and legacies of America's oldest public schools **Eleanor Cameron** Paul V. Allen, 2018-02-20 Eleanor Cameron 1912-1996 was an innovative and genre-defying author of children's fiction and children's literature criticism. From her beginnings as a librarian, Cameron went on to become a prominent and respected voice in children's literature writing one of the most beloved children's science fiction novels of all time, *The Wonderful Flight to the Mushroom Planet*, and later winning the National Book Award for her time fantasy *The Court of the Stone Children*. In addition, Eleanor Cameron played an often vocal role in critical debates about children's literature. She was one of the first authors to take up literary criticism of children's novels and published two influential books of criticism including *The Green and Burning Tree*. One of Cameron's most notable acts of criticism came in 1973 when she wrote a scathing critique of Roald Dahl's *Charlie and the Chocolate Factory*. Dahl responded in kind, and the result was a fiery imbroglio within the pages of the *Horn Book Magazine*. Yet despite her many accomplishments, most of Cameron's books went out of print by the end of her life, and her star faded. This biography aims to reinsert Cameron into the conversation by taking an in-depth look at her tumultuous early life in Ohio and California, her unforgettably forceful personality and criticism, and her graceful heartfelt novels. The biography includes detailed analysis of the creative process behind each of her published works and how Cameron's feminism, environmentalism, and strong sense of ethics are reflected in and represented by her writings. Drawn from over twenty interviews, thousands of letters, and several unpublished manuscripts in her personal papers, Eleanor Cameron is a tour of the most exciting and creative periods of American children's literature through the experience of one of its valiant purveyors and champions. *American Bee Journal*, 1897 Includes summarized reports of many bee keeper associations **Handbook of Digital Public History** Serge Noiret, Mark Tebeau, Gerben Zaagsma, 2022-04-04 This handbook provides a systematic overview of the present state of international research in digital public history.
