Introduction:

Creative thinking, problem solving, and decision making are each essential factors in the business process that are needed for the business to grow and take advantage of and/or create new opportunities for the business to benefit and increase profitability.

The difference between Problem Solving and Decision Making:

- Differences
 - ↳ Problem solving:
 - Being carried out (usually) in a group setting, or with multiple people around to get in the most ideas and narratives
 - Creative thinking and coming up with possible solutions
 - Innovation in ideas and being less judgemental
 - The job is to take time and sit and give input of multiple ideas rather than one
 - ↳ Decision making:
 - Seen as a more absolute direction
 - Usually carried out by one single person to take the ideas that came from the problem solving and choosing the suitable solution
 - Very logistical and wanting to get the job done instead of working on the job more to create better ideas, this is not creation it is a decision

The 7 Steps of the Problem Solving Process:

1. Identify problem at hand
2. Look at problem and attempt to understand it
3. Formulate a strategy
4. Put strategy in place
5. Allocate necessary resources
6. Monitor on progress of implementation and adapt accordingly
7. Decide whether or not the process or idea implemented was successful
