CPA Examination Review: Outlines and study guides Irvin N. Gleim,1978 **Journal of the American Medical Association** ,1917 *Spin Cycle* Jeffrey R. Henig,2008-02-13 One important aim of social science research is to provide unbiased information that can help guide public policies However social science is often construed as politics by other means Nowhere is the polarized nature of social science research more visible than in the heated debate over charter schools In *Spin Cycle* noted political scientist and education expert Jeffrey Henig explores how controversies over the charter school movement illustrate the use and misuse of research in policy debates Henig s compelling narrative reveals that despite all of the political maneuvering on the public stage research on school choice has gradually converged on a number of widely accepted findings This quiet consensus shows how solid research can supersede partisan cleavages and sensationalized media headlines In *Spin Cycle* Henig draws on extensive interviews with researchers journalists and funding agencies on both sides of the debate as well as data on federal and foundation grants and a close analysis of media coverage to explore how social science research is spun in the public sphere Henig looks at the consequences of a highly controversial New York Times article that cited evidence of poor test performance among charter school students The front page story based on research findings released by the American Federation of Teachers AFT sparked an explosive debate over the effectiveness of charter schools In the ensuing drama reputable scholars from both ends of the political spectrum launched charges and counter charges over the research methodology and the implications of the data Henig uses this political tug of war to illustrate broader problems relating to social science of what relevance is supposedly non partisan research when findings are wielded as political weapons on both sides of the debate In the case of charter schools Henig shows that despite the political posturing in public forums many researchers have since revised their stances according to accumulating new evidence and have begun to find common ground Over time those who favored charter schools were willing to admit that in many instances charter schools are no better than traditional schools And many who were initially alarmed by the potentially destructive consequences of school choice admitted that their fears were overblown The core problem Henig concludes has less to do with research itself than with the way it is often sensationalized or misrepresented in public discourse Despite considerable frustration over the politicization of research until now there has been no systematic analysis of the problem *Spin Cycle* provides an engaging narrative and instructive guide with far reaching implications for the way research is presented to the public Ultimately Henig argues we can do a better job of bringing research to bear on the task of social betterment *The Journal of the New York State Teachers' Association* ,1916 **Performance Costume** Sofia Pantouvaki,Peter McNeil,2020-12-10 Costume is an active agent for performance making it is a material object that embodies ideas shaped through collaborative creative work A new focus in recent years on research in the area of costume has connected this practice in vital and new ways with theories of the body and embodiment design practices artistic and other

forms of collaboration Costume like fashion and dress is now viewed as an area of dynamic social significance and not simply as passive reflector of a pre conceived social state or practice This book offers new approaches to the study of costume as well as fresh insights into the better understood frames of historical theoretical practice based and archival research into costume for performance This anthology draws on the experience of a global group of established researchers as well as emerging voices Below is a list of just some of the things it achieves 1 Introduces diverse perspectives innovative new research methods and approaches for researching design and the costumed body in performance 2 Contributes towards a new understanding of how costume actually performs in time and space 3 Offers new insights into existing practices as well as creating a space of connection between practitioners and researchers from design the humanities and social sciences

Scandal and Democracy Mary E. McCoy, 2019-03-15 Successful transitions to enduring democracy are both difficult and rare In *Scandal and Democracy* Mary E McCoy explores how newly democratizing nations can avoid reverting to authoritarian solutions in response to the daunting problems brought about by sudden change The troubled transitions that have derailed democratization in nations worldwide make this problem a major concern for scholars and citizens alike This study of Indonesia's transition from authoritarian rule sheds light on the fragility not just of democratic transitions but of democracy itself and finds that democratization's durability depends to a surprising extent on the role of the media particularly its airing of political scandal and intraelite conflict More broadly *Scandal and Democracy* examines how the media's use of new freedoms can help ward off a slide into pseudodemocracy or a return to authoritarian rule As Indonesia marks the twentieth anniversary of its democratic revolution of 1998 it remains among the world's most resilient new democracies and one of the few successful democratic transitions in the Muslim world McCoy explains the media's central role in this change and corroborates that finding with comparative cases from Mexico Tunisia and South Korea offering counterintuitive insights that help make sense of the success and failure of recent transitions to democracy Proceedings of the Parliament of South Australia South Australia. , 1956 Cumulated Index Medicus, 1971 The Knowledge Gap Natalie Wexler, 2020-08-04 Essential reading for teachers education administrators and policymakers alike STARRED Library Journal The untold story of the root cause of America's education crisis It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education The problem wasn't one of the usual scapegoats lazy teachers shoddy facilities lack of accountability It was something no one was talking about the elementary school curriculum's intense focus on decontextualized reading comprehension skills at the expense of actual knowledge In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars* Wexler brings together history research and compelling characters to pull back the curtain on this fundamental flaw in our education system one that fellow reformers journalists and policymakers have long overlooked and of which the general public

including many parents remains unaware But The Knowledge Gap isn't just a story of what schools have gotten so wrong it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed If we truly want to fix our education system and unlock the potential of our neediest children we have no choice but to pay attention Industrial Arts & Vocational Education ,1915 *Industrial-arts Magazine* ,1915

Pilat,2017-03-21 Given recent controversies over suspected WMD programs in proliferating countries there is an increasingly urgent need for effective monitoring and verification regimes the international mechanisms including on site inspections intended in part to clarify the status of WMD programs in suspected proliferators Yet the strengths and limitations of these nonproliferation and arms control mechanisms remain unclear How should these regimes best be implemented What are the technological political and other limitations to these tools What technologies and other innovations should be utilized to make these regimes most effective How should recent developments such as the 2015 Iran nuclear deal or Syria's declared renunciation and actual use of its chemical weapons influence their architecture The Politics of Weapons Inspections examines the successes failures and lessons that can be learned from WMD monitoring and verification regimes in order to help determine how best to maintain and strengthen these regimes in the future In addition to examining these regimes technological political and legal contexts Nathan E Busch and Joseph F Pilat reevaluate the track record of monitoring and verification in the historical cases of South Africa Libya and Iraq assess the prospects of using these mechanisms in verifying arms control and disarmament and apply the lessons learned from these cases to contemporary controversies over suspected or confirmed programs in North Korea Iran and Syria Finally they provide a forward looking set of policy recommendations for the future Poultry, Garden and Home ,1928 **Journal of the New York State**
