An Age of Accountability John L. Rury,2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

Limited Government Peter Murphy,2018-10-10 This book explores why despite increased government spending on income support health and education the costs of public goods are rising and their quality is declining Charting the rise of big government the author identifies a growing divergence between public sector ideals and the realities of troubled political economies grappling with debt deficits ageing populations improvident social insurance declining education test scores and multiplying health costs Limited Government analyzes in detail the social and political factors in major economies that drive up public spending as well as the relationship between spending and outcomes By developing an alternate model of public finances and engaging in a critique of the managerial society the author emphasizes the positive effects of self management social self organization and technological automation arguing that high quality low cost goods are the result of nations that save not states that tax A sociological account of public finances Limited Government outlines how governments can spend less and yet help ensure good broad equitable standards of health education and income security

Minerals Yearbook ,2011 *Governance in Higher Education* Nehme

Azoury,Georges Yahchouchi,2023-12-27 Over the years the education sector has witnessed substantial transformations and developments driven primarily by the rapid growth of technology and inventive pedagogical approaches In the MENA region these changes have been particularly noteworthy as educational institutions are striving to keep pace with global advancements while addressing unique regional challenges Set against this context this book delves into two pivotal

dimensions that have surfaced as vital for thriving in today's educational sphere with a strong emphasis on the MENA region's distinct characteristics and opportunities. The first dimension explores the evolution and challenges in governance encompassing the organizational frameworks, decision-making mechanisms and policies that empower educational institutions in the MENA region to adapt to the shifting environment. The second dimension zeroes in on the metamorphosis of education itself, emphasizing the innovative tools, assignments and methodologies that are accessible to educators in the region and discussing the balance between these elements and effective university governance. By offering an exhaustive and up-to-date examination of these two dimensions, this book imparts invaluable insights and pragmatic guidance to educational professionals, policymakers and students alike, all with a focus on the MENA region. It aims to equip readers with the knowledge and abilities required to successfully navigate the new educational landscape and excel in the world of academia while highlighting the unique potential and prospects of the region's educational institutions.

The Disorder of Mathematics Education Hauke Straehler-Pohl, Nina Bohlmann, Alexandre Pais, 2016-08-23. Research within a socio-political paradigm or turn has been gradually recognized and institutionalized as an important part of mathematics education. This book focuses on the neglected problems, tensions and contradictions evoked by this process. The authors do this by challenging current regimes of truth about mathematics education by identifying how recent technological developments challenge or suspend contemporary conceptions of mathematics education by critiquing the ideological entanglement of mathematics, its education and schooling with capitalism, by self-reflective analyses of researchers' impacts on shaping what is and can be perceived as the practice of mathematics education research and by confronting mainstream mathematics education with socio-political contexts that are usually neglected. In this way, mathematical rationality becomes contextualized within contemporary society where it reproduces itself through technologies, social practices, media and other spheres of social life.

Refugee, Migrant and Ethnic Minority Health Osnat Keidar, Emmanouil Pikoulis, Aristomenis Exadaktylos, David Shiva Srivastava, 2019-10-07. International migration, particularly to Europe, has increased in the last few decades, making research on aspects of this phenomenon, including numbers, challenges and successes, particularly vital. This Special Issue highlights this necessary and relevant area of research. It presents 37 articles, including studies on diverse topics relating to the health of refugees and migrants. Most articles (28) present studies focusing on European host countries. The focus on Europe is justified if we take into consideration the increased number of refugees and migrants who have come to Europe in recent years. However, there are also articles which present studies from countries in other continents. The topics discussed in the Issue include healthcare utilization, infectious diseases, mother and child health, mental health and chronic diseases. Findings from the included articles indicate that further development of guidelines and policies at both local and international levels is needed. Priorities must be set by encouraging and funding in-depth research that aims to evaluate the impact of existing policies and interventions. Such research will help us formulate recommendations for the development of

strategies and approaches that improve and strengthen the integration of migrants and refugees into the host countries

Science Fictions Stuart Ritchie, 2020-07-21 An insider's view of science reveals why many scientific results cannot be relied upon and how the system can be reformed Science is how we understand the world Yet failures in peer review and mistakes in statistics have rendered a shocking number of scientific studies useless or worse badly misleading Such errors have distorted our knowledge in fields as wide ranging as medicine physics nutrition education genetics economics and the search for extraterrestrial life As Science Fictions makes clear the current system of research funding and publication not only fails to safeguard us from blunders but actively encourages bad science with sometimes deadly consequences Stuart Ritchie's own work challenging an infamous psychology experiment helped spark what is now widely known as the replication crisis the realization that supposed scientific truths are often just plain wrong Now he reveals the very human biases misunderstandings and deceptions that undermine the scientific endeavor from contamination in science labs to the secret vaults of failed studies that nobody gets to see from outright cheating with fake data to the more common but still ruinous temptation to exaggerate mediocre results for a shot at scientific fame Yet Science Fictions is far from a counsel of despair Rather it's a defense of the scientific method against the pressures and perverse incentives that lead scientists to bend the rules By illustrating the many ways that scientists go wrong Ritchie gives us the knowledge we need to spot dubious research and points the way to reforms that could make science trustworthy once again

Stranger Danger Paul M. Renfro, 2020-05-01 Beginning with Etan Patz's disappearance in Manhattan in 1979 a spate of high profile cases of missing and murdered children stoked anxieties about the threats of child kidnapping and exploitation Publicized through an emerging twenty four hour news cycle these cases supplied evidence of what some commentators dubbed a national epidemic of child abductions committed by strangers In this book Paul M Renfro narrates how the bereaved parents of missing and slain children turned their grief into a mass movement and alongside journalists and policymakers from both

major political parties propelled a moral panic Leveraging larger cultural fears concerning familial and national decline these child safety crusaders warned Americans of a supposedly widespread and worsening child kidnapping threat erroneously claiming that as many as fifty thousand American children fell victim to stranger abductions annually The actual figure was and remains between one hundred and three hundred and kidnappings perpetrated by family members and acquaintances occur far more frequently Yet such exaggerated statistics and the emotionally resonant images and narratives deployed behind them led to the creation of new legal and cultural instruments designed to keep children safe and to punish the strangers who ostensibly wished them harm Ranging from extensive child fingerprinting drives to the milk carton campaign from the AMBER Alerts that periodically rattle Americans smart phones to the nation s sprawling system of sex offender registration these instruments have widened the reach of the carceral state and intensified surveillance practices focused on children Stranger Danger reveals the transformative power of this moral panic on American politics and culture showing how ideas and images of endangered childhood helped build a more punitive American state **Federal Register** ,2012-11
