Department of Basic Education,2016 Telling Tales Over Time Joel Weiss,Robert S. Brown,2013-06-13 How do calendars and clocks influence considerations of school effectiveness From the creation of compulsory education to the future of virtual schooling Weiss and Brown trace two centuries of school practices policies and research linking the concept of time with opportunity to learn School calendars and clocks are shaped by both the physical and social worlds and the clock of schooling is shown to be one of the great clocks of society that helps to frame school effectiveness School time does not operate in a vacuum but within curriculum teaching and learning situations The phrase chrono curriculum was devised by the authors as a metaphor for exploring issues of school effectiveness within the time dimension Using American and Canadian sources stories are created to illustrate four themes about time and school effectiveness The first three stories utilize access attendance and testing as criteria associated with these eras of schooling How will the story read in the fourth era the digital age which forces us to a reconsideration of time and its influence on education Quoting David Berliner in his Foreword this is an opportune time for these authors to bring us insights into the reasons we in North America created our public school systems and how the chrono curriculum influences those systems The authors presentation of our educational past provides educators a chance to think anew about how we might do schooling in our own times

Social Construction of International Politics Ted Hopf,2002 In this deeply researched book Ted Hopf challenges contemporary theorizing about international relations He advances what he believes is a commonsensical notion a state s domestic identity has an enormous effect on its international policies Hopf argues that foreign policy elites are inextricably bound to their own societies in order to understand other states they must first understand themselves To comprehend Russian and Soviet foreign policy it is just as important to read what is being consumed on the Moscow subway as it is to conduct research in the Foreign Ministry archives the author says Hopf recreates the major currents in Russian Soviet identity reconstructing the identity topographies of two profoundly important years 1955 and 1999 To provide insights about how Russians made sense of themselves in the post Stalinist and late Yeltsin periods he not only uses daily newspapers and official discourse but also delves into works intended for mass consumption popular novels film reviews ethnographic journals high school textbooks and memoirs He explains how the different identities expressed in these varied materials shaped the worldviews of Soviet and Russian decisionmakers Hopf finds that continuous renegotiations and clashes among competing domestic visions of national identity had a profound effect on Soviet and Russian foreign policy Broadly speaking Hopf shows that all international politics begins at home

teachers often with their students for most or all of the day have the opportunity to creatively integrate instruction across classes In this text we explore meaningful pedagogical cross over that goes beyond the surface level to build strong foundations and deep connections for teaching and learning in interdisciplinary ways *Collecting for the Curriculum* Amy J. Catalano,2015-09-28 If you re a librarian charged with collecting curriculum materials and children s literature to support the Common Core State Standards then this book the only one that offers explicit advice on collection development in curriculum collections is for you While there are many publications on the Common Core for school librarians and K 12 educators no such literature exists for curriculum librarians at the post secondary level This book fills that gap standing alone as a guide to collection development for curriculum librarians independent of the Common Core State Standards CCSS The book provides instruction and guidance to curriculum librarians who acquire and manage collections so you can develop a collection based on best practices The book begins with a primer on the CCSS and how curriculum librarians can support them Discussion of the Standards is then woven through chapters arranged by content area that share research based practices in curriculum development and instruction to guide you in curriculum selection Material types covered include games textbooks children s literature primary sources counseling and nonfiction Additional chapters cover the management of curriculum collections testing collections and instruction and reference as well as how to support and collect for special needs learners Current practices in collection development for curriculum materials librarians are also reviewed The book closes with a discussion of the future of curriculum materials

What Shall We Tell the Children? Stuart J. Foster,Keith A. Crawford,2006-04-01 The pages of this book illustrate that as instruments of socialization and sites of ideological discourse textbooks are powerful artefacts in introducing young people to a specific historical cultural and socioeconomic order Crucially exploring the social construction of school textbooks and the messages they impart provides an important context from within which to critically investigate the dynamics underlying the cultural politics of education and the social movements that form it and which are formed by it The school curriculum is essentially the knowledge system of a society incorporating its values and its dominant ideology The curriculum is not our knowledge born of a broad hegemonic consensus rather it is a battleground in which cultural authority and the right to define what is labelled legitimate knowledge is fought over As each chapter in this book illustrates curriculum as theory and practice has never been and can never be divorced from the ethical economic political and cultural conflicts of society which impact so deeply upon it We cannot escape the clear implication that questions about what knowledge is of most worth and about how it should be organized and taught are problematic contentious and very serious
