Origin and Evolution of Precambrian High-grade Gneiss Terranes, with Special Emphasis on the Limpopo Complex of Southern Africa D. D. Van Reenen, 2011-01-01 **The Web of Geological Sciences:** Marion E. Bickford, 2017-09-29 The web of geological sciences Special papers 500 and 523 written in celebration of the 125th anniversary of the Geological Society of America **South African Journal of Geology**, 2006 Using Geochemical Data Hugh Rollinson, Victoria Pease, 2021-05-06 This textbook is a complete rewrite and expansion of Hugh Rollinson's highly successful 1993 book *Using Geochemical Data: Evaluation, Presentation, Interpretation*. Rollinson and Pease's new book covers the explosion in geochemical thinking over the past three decades as new instruments and techniques have come online. It provides a comprehensive overview of how modern geochemical data are used in the understanding of geological and petrological processes. It covers major element, trace element and radiogenic and stable isotope geochemistry. It explains the potential of many geochemical techniques, provides examples of their application and emphasizes how to interpret the resulting data. Additional topics covered include the critical statistical analysis of geochemical data, current geochemical techniques, effective display of geochemical data and the application of data in problem solving and identifying petrogenetic processes within a geological context. It will be invaluable for all graduate students, researchers and professionals using geochemical techniques. *Current Law Index*, 1993 *Budget Review South Africa*, 2005 *Evolution of Early Earth's Atmosphere, Hydrosphere, and Biosphere* Stephen E. Kesler, Hiroshi Ohmoto, 2006-01-01 The history of Earth's early atmosphere, hydrosphere and biosphere from Hadean through Proterozoic time is one of geology's enduring puzzles. Ore deposits provide important insights into this history because they contain elements and minerals that are highly sensitive to the geochemical environment in which they form. Just what these minerals tell us remains a matter of considerable debate, however. When and how did life develop? An oxygen-rich atmosphere formed and sulfate dominated the ocean. This volume contains reports on these questions from both sides of the aisle for iron and manganese formations, uranium paleoplacers and hydrothermal deposits and exhalative sulfides and oxides.
