International Handbook of Research on Multicultural Science Education Mary M. Atwater,2022-06-30 This handbook gathers in one volume the major research and scholarship related to multicultural science education that has developed since the field was named and established by Atwater in 1993 Culture is defined in this handbook as an integrated pattern of shared values beliefs languages worldviews behaviors artifacts knowledge and social and political relationships of a group of people in a particular place or time that the people use to understand or make meaning of their world each other and other groups of people and to transmit these to succeeding generations The research studies include both different kinds of qualitative and quantitative studies The chapters in this volume reflect differing ideas about culture and its impact on science learning and teaching in different K 14 contexts and policy issues Research findings about groups that are underrepresented in STEM in the United States and in other countries related to language issues and indigenous knowledge are included in this volume Leading under Duress Jean-Pierre Bongila,2024-11-15 This comparative study of teacher attrition in the Global South and OECD countries examines the exceptionality of twenty selected learning leaders in the D R

Congo Ghana and Uganda who have stayed in the teaching profession and led their student learning with devotion and integrity Like any learning leader exceptional teachers live the challenges and pressures that have caused some of their peers to leave the profession The extraordinary learning leaders from elementary secondary and higher education have stood victorious amid education devaluations and professional tensions The author gives voice to those exceptional teachers and analyzes the ethical rationale behind their unfailing commitment to their teaching vocation Their teaching philosophies and personal accounts revealed altruistic impulses This book further explores the exceptional teachers narratives and their selfless actions through the lens of philanthropic and leadership ethics theories Although the exceptional teachers altruism appears self sacrificing it embodies some form of self benefit because one can hardly fathom altruism for altruism s sake Nevertheless the twenty exceptional teachers acted in a self sacrificing manner The author appeals to the Global South countries to implement education policies that should redecorate the profession of learning leadership *France Raymond*
