Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in
which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of
mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching
the question of how these effects are to be generated and sustained is far from evident The question of how to turn research
into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social
injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus
of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal
about what can be done and how so that its research generated insights have a tangible beneficial impact on what is
happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of
researchers communicating their insights to those responsible for educational practice the book deals with the perennial
question of communication between those who study educational processes and those who are directly responsible for
teacher education educational research and classroom practices This book will be key reading for postgraduates researchers
and academics in education and particularly in the areas of mathematics education education research teacher education and
classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in
educational research **Sri Lanka Education Sector Assessment** Halil Dundar, Benoit Millot, Michelle Riboud, Mari
Shojo, Harsha Aturupane, Sangeeta Goyal, Dhushyanth Raju, 2017-06-16 A country's education system plays a pivotal role in

promoting economic growth and shared prosperity Sri Lanka has enjoyed high school attainment and enrollment rates for several decades However it still faces major challenges in the education sector and these challenges undermine the country's inclusive growth goal and its ambition to become a competitive upper middle income country The authors of Sri Lanka Education Sector Assessment Achievements Challenges and Policy Options offer a thorough review of Sri Lanka's education sector from early childhood education through higher education With this book they attempt to answer three questions How is Sri Lanka's education system performing especially with respect to participation rates learning outcomes and labor market outcomes How can the country address the challenges at each stage of the education process taking into account both country and international experience and also best practices Which policy actions should Sri Lanka make a priority for the short and medium term The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them To attain inclusive growth and become globally competitive Sri Lanka needs to embark on integrated reforms across all levels of education These reforms must address both short-term skill shortages and long-term productivity As Sri Lanka moves up the development ladder the priorities of primary secondary and postsecondary education must be aligned to meet the increasingly complex education and skill requirements
