Q.21 Read the extract and answer the questions given below

3

If you work out the latitudinal and longitudinal extent of India, they are roughly about 30 degrees, whereas the actual distance measured from north to south extremity is 3,214 km, and that from east to west is only 2,933 km.

This difference is based on the fact that the distance between two longitudes decreases towards the poles whereas the distance between two latitudes remains the same everywhere.

From the values of latitude, it is understood that the southern part of the country lies within the tropics and the northern part lies in the sub-tropical zone or the warm temperate zone. This location is responsible for large variations in land forms, climate, soil types and natural vegetation in the country.

Now, let us observe the longitudinal extent and its implications on the Indian people. From the values of longitude, it is quite discernible that there is a variation of nearly 30 degrees, which causes a time difference of nearly two hours between the easternmost and the westernmost parts of our country.

A) How the distance between latitude and longitude varies from equator to poles?

B) What types of variations are caused due to large latitudinal extension?

C) What is the local time interval between Gujarat and Arunachal Pradesh?

Keeping Girls in School McConnell,Christin ,Mupuwaliywa,Mupuwaliywa ,2015 International evidence indicates that keeping girls in school positively impacts their life trajectory and benefits the well being of the next generation Malawi has made progress in increasing overall enrollment rates but additional effort is still needed to ensure that adolescent girls stay in school and complete a quality education Starting in the upper grades of primary school adolescent girls are more likely to drop out of school than their male counterparts with pregnancy early marriage and school fees frequently cited as the main reasons One of the key challenges in Malawi will be to both focus on girls before they reach puberty and ensure that they get the support they need to complete primary school and successfully transition to secondary school Meanwhile adolescent boys will also need support and guidance to invest in their own education and to value the education of their female peers as a way to build stronger families and communities and break the inter generational cycle of poverty The Government of Malawi will need to assess the effectiveness and sustainability of its policy and programs including those by partners to scale and consolidate accordingly in order to avoid a scattered approach

The Ionian Islands in the Bronze Age and Early Iron Age Christina

Souyoudzoglou-Haywood,2025-08-05 The central Ionian Islands occupy a special geographical position in the eastern Mediterranean On the one hand they face and are in close proximity to the western Greek mainland and on the other they are connected with the western Balkans and the central Mediterranean through the Ionian and Adriatic seas Although with the exception of Corfu they were integrated in the Aegean cultural sphere of influence throughout the Bronze Age and Early Iron Age their marginal position and insularity also contributed to the formation of particular sociocultural identities individually and as a group On occasions these conditions also made them highly desirable as spaces for wide ranging maritime based interactions and inter cultural exchanges Culturally the islands remained above all a part of the western periphery of the Aegean world pulsing to its major changes and upheavals In the twenty years since the first edition of *The Ionian Islands in the Bronze Age and Early Iron Age* came out there has been a significant surge of interest in peripheries and their role in the construction of cultural and historical narratives about Greece over the centuries Yet the Ionian Islands have by and large been left behind in these discussions This fully revised second edition of the book incorporates all the recent discoveries and studies as well as updating a large part of the earlier evidence and aims to bring the islands back to the centre of debates and showcase their relevance
