Placing Internationalism Stephen Legg,Mike Heffernan,Jake Hodder,Benjamin Thorpe,2021-11-04 Exploring how modern internationalism emerged as a negotiated process through international conferences this edited collection studies the spaces and networks through which states civil society institutions and anti colonial political networks used these events to realise their visions of the international Taking an interdisciplinary approach contributors explore the spatial paradox of two fundamental features of modern internationalism First internationalism demanded the overcoming of space transcending the nation state in search of the shared interests of humankind Second internationalism was geographically contingent on the places in which people came together to conceive and enact their internationalist ideas From Paris 1919 to Bandung 1955 and beyond this book explores international conferences as the sites in which different forms of internationalism assumed material and social form While international permanent institutions such as the League of Nations UN and Institute of Pacific Relations constantly negotiated national and imperial politics lesser resourced political networks also used international conferences to forward their more radical demands Taken together these conferences radically expand our conception of where and how modern internationalism emerged and make the case for focusing on internationalism in a contemporary moment when its merits are being called into question

After the Education Wars Andrea Gabor,2018-06-12 The education wars have been demoralizing for teachers After the Education Wars helps us to see a better way forward Cathy N Davidson The New York Times Book Review After the Education Wars is an important book that points the way to genuine reform Diane Ravitch author of Reign of Error and The Death and Life of the Great American School System A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic

entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the market based measures and carrot and stick incentives informing today s reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state s once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what s needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools World History for Children and Young Adults Vandelia
